

Land Use Land Cover Update 2008

Feature Dataset:	Environmental
Feature Class:	LULC
Departments:	Agricultural Preserve, Planning, Property Assessment
Data Source:	Photogrametric - ADR and GDI Field check - GDI

Codes and Descriptions

ID	Modified Anderson Level II Land use code 111 through 770. Valid codes are as follows:
111	Residential - less than 2 units per acre.
112	Residential - 2.1 to 7 units per acre (villages, neighborhoods, highway strip houses).
113	Residential - more than 7 units per acre (trailer parks, apartment buildings, condominiums, row homes).
114	Farmsteads with outbuildings - farmhouses, usually associated with and including, barns and outbuildings. (NOT including large, commercial-sized hog/chicken operations - #230). Agricultural production may or may not be active.
120	Commercial and services - Any apparent store, shop, mall, gas station or place of business where large-scale production is not occurring.
130	Industrial - Large buildings that may have production in process.
140	Transportation and utilities - Wide transportation corridors (including 4-lane divided highways), toll booth areas, highway departments, transmission stations, water towers/tanks, sewage treatment plants.
150	Industrial and commercial complexes - Large areas where there are many adjacent industrial plants and/or other businesses. Only used when unable to determine the exact use as either 120 or 130.
160	Mixed urban or built-up land - Densely developed land generally associated with urban centers. This category is often comprised of a mix of other developed land categories (i.e. 113, 120, 150, and 180) and is generally only used where development patterns are too complex to easily delineate separate developed land categories. For this project, this category will be rarely (if ever) used because the 300-scale photos appear to be sufficiently detailed to allow discrimination of separate categories.
170	Other: Areas whose land use does not fit into any particular category or can not be interpreted from the aerial photography.
180	Institutional - Schools, hospitals, or other institutional facilities. Churches and adjoining cemeteries. Stand-alone municipal buildings, including parking/storage areas for municipal equipment (i.e. snow plows). Also, stand-alone fire houses. Usually large buildings, surrounding access road with parking areas some landscaping, well-kept grounds.
190	Recreational - Active Recreation Parks (i.e. ball fields, playgrounds, tennis

	courts). Also campgrounds, golf courses, hunt clubs.
211	Agriculture: cropland
212	Agriculture: pasture
213	Agriculture: other unclassified agriculture land
220	Orchards/groves/vineyards/nurseries - Other horticulture, trees and plants forming grid or regular patterns.
230	Large Confined Feeding Operations - Usually associated with a farmstead (114) these are commercial-sized buildings housing hog or chicken operations.
240	Other agriculture
310	Herbaceous - Open, grassy areas with few trees or shrubs. Generally refers to ungrazed or uncontrolled grass land, but also includes very large lawns and large cemeteries not adjacent to a church.
320	Shrub/brush - Areas where shrubs, brush, and/or very small trees are present.
330	Mixed cover - Areas that are not forested but have a mixture of vegetation.
410	Deciduous forest.
420	Coniferous forest.
430	Mixed forest.
500	Open water (Hydrology polygons from ADR).
610	Forested wetlands - Wooded areas that appear to have very wet ground (location from NWI or TNC; linework by GDI).
620	Non-forested wetlands - Swamps, and areas that have substantially wet ground (location from NWI or TNC; linework by GDI).
730	Sandy non-beach.
740	Rock outcrops
750	Mines/quarries/pits and junk yards/land fills.
760	Transitional (under construction).
770	Mixed barren and vegetated (basic disturbed class).
997	Islands less than minimum mapping unit size.
998	Any land within a tile that is not in an area where mapping is required.

NWI_Class Use only for wetland polygons. NWI_Class is blank for non-wetlands polygons. Codes as per National Wetlands Inventory (NWI) wetlands and TNC wetland codes. NWI Wetlands code (PFo1b, etc.).

FLAG	0	Default value, no review needed
	1	Flag to polygon to be reviewed at a later date

COMMENTS Text field for comments, can be used to store information regarding questions on flagged features.
