

Chesapeake Bay Program Partnership
BMP Verification Committee
Ad Hoc Transparency Subgroup
May 7, 2013

Background

The Agriculture Workgroup sought guidance on a particular aspect of the BMP Verification Principles – transparency – described in Principle 3, Public Confidence:

Verification protocols incorporate transparency in both the processes of verification and tracking and reporting of the underlying data. Levels of transparency will vary depending upon source sector, acknowledging existing legal limitations and the need to respect individual confidentiality to ensure access to non-cost shared practice data.

The following definition and recommendations are proposed to clarify the concept of transparency across all nonpoint sources. Transparency has been defined under the Clean Water Act (CWA), and it's regulatory and policy framework, which defines site-specific data transparency requirements for all sources of nutrients and sediments regulated as point sources.

Proposed Addendum to the BMP Verification Principles¹: Transparency

Definition of transparency

Transparency means operating in a way so an outside reviewer can determine what actions were taken, which data were used to generate a report or conclusion, how data was obtained, what measures were employed to ensure data accuracy, who is responsible for data collection and generation, who is responsible for ensuring data accuracy, and the methods of data analysis utilized.

Recommendations

1. The measure of transparency will be applied to two primary areas of verification: data collection and data reporting.
2. Transparency of the process of data collection must incorporate independent QA/QC procedures.
3. Transparency of the data reported should be transparent at the most site-specific scale that conforms with legal and programmatic constraints, and at a scale compatible to data input for the Chesapeake Bay Program partnership modeling tools.
4. It is recognized that transparency of data reported will vary across verification methods and data collection and reporting programs. This variance, however, should not negate the commitment and obligation to ensure transparency at the highest level possible.
