

The Chesapeake Bay Program received the following comment letter from 73 stakeholders/members of the Maryland Blue Crab Design Team.

The Maryland Blue Crab Industry has made great sacrifices in order to achieve unprecedented advancements toward sustainability. We need to support Maryland's Crab Industry, the Maryland DNR, and Maryland residents in continuing this vital process. Keep jurisdictional rights to Maryland's Chesapeake Bay Blue Crab in the hands of its residents. This Management Strategies document needs to be clearer and explicitly state Maryland's jurisdictional right.
