

Shad Abundance (2007)

Ecosystem Health Assessment

Susquehanna
0.01%
(York Haven Dam)

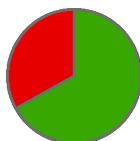

Note:

Data for the York and Potomac Rivers were provided by the Virginia Institute of Marine Science via an ongoing Catch per Unit Effort (CPUE) study involving American Shad gill-netting. Data for the Susquehanna and James Rivers represent published fishway passage values for York Haven and Boshers Dams, respectively.

Potomac
67%

York
28%

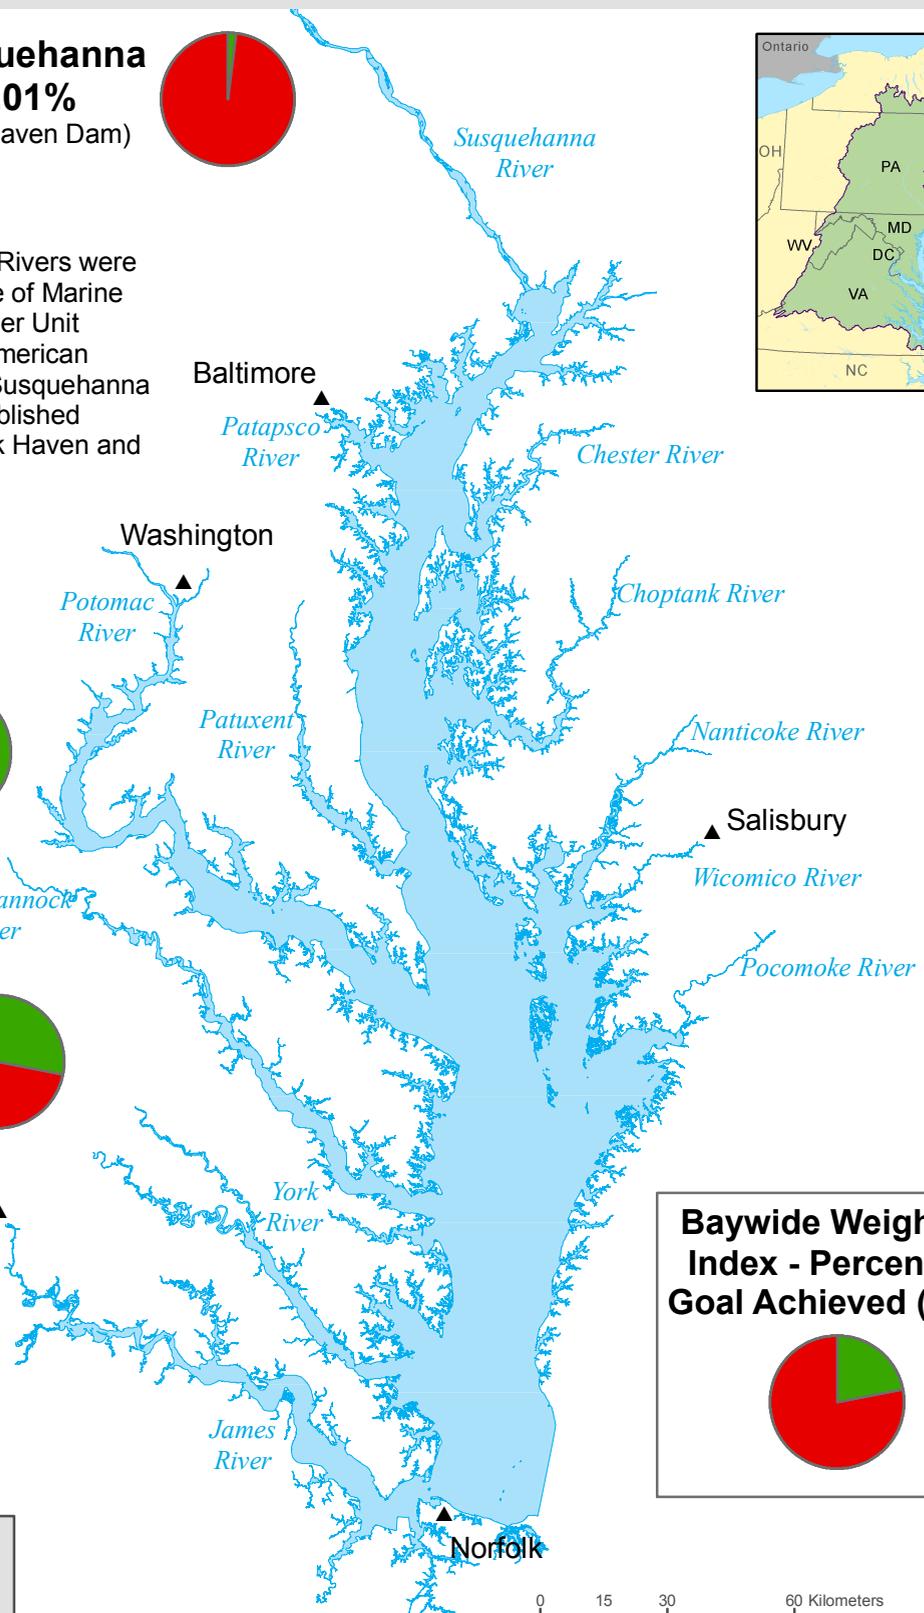

James
0.02%

(Boshers Dam)

Baywide Weighted Index - Percent of Goal Achieved (22%)

Data Sources: Fishway Passage Data from Conowingo and Boshers Dams, VIMS CPUE gill-netting data
