Slide 7 – simulation of EPA, state breakouts

Slide 9 – Sector breakout has value in solving finger pointing of different sectors

*State Feedback:*

*MD:* Including sediment is a concern.

*PA:* Concerned that public will have to dig down for indicators. Request that Bay Barometer bring forward historical information in foreword.

*CBF:* Combine EPA indicators.

*NY:* Public understands that federal Clean Air Act still requires state actions

*VA:* Wastewater data comes together mid-spring. How can we resolve this issue?

*Sylvester:* When people drill down they will see when the data is from.

Slide 17 – Communications Workgroup supports phased approach described on slides 3 or 4

*State Feedback:*

*MD:* We do not agree. We have been striving for these milestones and they are part of our WIP. BayStat is in place and we are ready to report tracking on 2-yr milestones but don't know how the other states are reporting.

*VA:* Prefer option 3.

*WV:* We cannot do separate tracking but thought tracking of implementation milestones would inform Bay Barometer.

*PA:* Maybe option 5 to get it away from Bay Barometer. I will consult with management and have a firm decision.

*CBF:* Recommend Bay Barometer as snapshot of how the Bay is doing and not the ongoing efforts, but be careful transmitting so many messages and tools

*DE:* Leaning toward option 5.

*NY:* Flexible, no comparison of 4.3-5.3 but we might like to see it.

**ACTION:** Submit comments on the Bay Barometer to Nita Sylvester by September 27, 2010.
