

WWTWG 2.7.12

<http://www.chesapeakebay.net/calendar/event/17868/>

BMP Verification Program- Batiuk

- Spano- intent to have this fully integrated?
- Yes, part of what we have built for years. Worked through entire process with details of how its tracked, verified etc. Takes it from installation with credit and assurance it is working the way envisioned
- Montali- looking to workgroup for writing of protocols?
- Yes, will see in next few slides
- Spano- how is growth lag fit into assessment?
- Won't get that in BMP efficiency, but in evolution of modeling and understanding of system. Science lags but USGS is working this out for watershed
- Spano- integration of stormwater and wastewater
- See last 3 slides for request to workgroup
- Montali- would like workgroup to endorse some of the things already in WV WIP. Look forward to being part of this process.
- Can share AGWG and USWG protocols to show what is taking place in other groups. It can be night and day but will work to develop template including flexibility
- Montali- share some principles for us to base principles off of so wgs have idea of what to work with but with flexibility where needed

Update on Data Reporting System- Hurd

- Streamlining and updating process to capture PS data
- Completed first step, integrating enterprise database
- Working to get info into the system/ testing over next few months
- Zhou- have most of 2011 data in, waiting on a few expected in next few weeks

Update on Septic Expert Panel- Sievers

- Panel finalized
- Next call to be held Feb 14th
- Please provide any documentation you might have for the group

Update on STAC Workshop- Spano

- Agreed on date- May 16th in Richmond VA
- Virginia Water Environment was having workshop and decided to partner
