

Proposed Phase 6.0 land use	Eligible for manure	Notes
Corn or sorghum grain - elig. for manure	Y	Grain utilizing mostly poultry manure.
Corn or sorghum silage - elig. for manure	Y	Silage utilizing ruminant manure.
Corn or sorghum grain – no manure	N	Grain without manure
Corn or sorghum silage – no manure	N	BMP: P limited or maybe v. high P; Silage no manure
*Sm gr & soybean – no manure	N	Dbl crop beans utilizing short season
Full season soybean – no manure	N	Full season beans, shouldn't use manure
*Sm gr & grain - elig. for manure	Y	Silage system using manure w/o legume
Other Agronomic crops	Y	Large tracts, BMPs like above, tobacco, cotton, etc.
Pasture – direct dep; elig. for manure	Y	All grazed lands, Nutrient app beyond D. dep. Determined by nut app change point %
Legume (or legume-grass mix) Hay	Y	Cut forage
Other Hay	Y	Cut forage , manure app preferentially to leguminous hay
Ag open space	N	BMP landuse (non-forest); atm dep
Specialty - high input	Y	Small tracts, high nut. use, e.g. potato, sweet corn
Specialty - Low input	Y	Small tracts, low nut. use, e.g. grapes, B&B nursery
Impervious farmstead (aee note)	N	Based on imagery data; could disappear based on imagery from Peter Claggett
Pervious farmstead	N	Based on imagery data
Non-permitted feeding operation space	N	Based on imagery data
Permitted (or NOI) feeding operation space	N	Based on permit data (subset of above)
