Climate Change Research and Adaptation in the Chesapeake Bay Watershed

A compilation of recent and ongoing efforts compiled by the Chesapeake Bay Program Partnership’s Climate Resiliency Working Group

July, 2016
This compilation of current adaptation activities and research efforts was compiled by the Chesapeake Bay Program Partnership’s Climate Resiliency Workgroup. The contents of this document were compiled based on the knowledge and awareness of projects that relate to the 2014 Chesapeake Bay Agreement Goal, to "increase the resiliency of the Chesapeake Bay Watershed, including its living resources, habitats, public infrastructure and communities, to withstand adverse impacts from changing environmental and climate conditions." This document is not intended to be an exhaustive list; recognizing that there are additional adaptation activities and research underway within the region or being undertaken at the local level. This document will be updated on an annual basis. Please contact Zoë Johnson, CBP Climate Change Coordinator (zoe.johnson@noaa.gov) to suggest content for the next edition of this publication.
