

Alex Foraste

I would like to nominate John "Alex" Forasté to continue the DOT participation as an at-large member. As you may be aware, Alex is solutions oriented and results driven, and has a passion for the field. He has been with VDOT since 2018, and in 2020, became our Water Resource Program Manager overseeing the implementation of our MS4 and Resiliency programs. ***I want to emphasize the unique perspective he brings from a stormwater perspective as well as a climate change perspective.***

Alex Forasté has 16 years of engineering and water resource experience. He has a strong knowledge base of civil engineering principles, with a specialty in stormwater management and erosion sediment control in the transportation environment, with background that includes roadway hydraulic design and roadway design. Prior to his work at VDOT, he served as the Richmond office Water Resources Team Leader for Stantec, where he led and managed staff, administered contract and project management responsibilities, and provided technical expertise.

He is a licensed P.E. in Virginia, DEQ ESC/SWM Combined Administrator, and has a BS and Masters in Civil Engineering with a focus in Water Resources.

He is copied on this email. However, should you need to reach him directly here is his contact info:

J. Alex Forasté
Water Resources Program Manager
Location & Design Division
Virginia Department of Transportation
