

BMP Tracking and Reporting

Olivia H. Devereux

July 19, 2012

CBP WQGIT BMP Verification
Committee

Federal Cost Shared BMPs

- Status of data request from USGS to NRCS
- Data fields are required to accomplish the following three goals:
 - Remove dupes between NRCS data and state data. Occurs where the same practice is co-funded.
 - Meet the reporting requirements of CBP (include land use and other detail)
 - Provide adequate level of detail for verification to occur

2011 Progress

- Programmatic verification
 - Substantial changes in implementation (increase or decrease)
 - New BMPs
 - Loss of BMPs that historically were reported
 - Review BMP definitions to make sure they are clear (E.g.: cover crops)
