Invasive Catfish Workgroup Project Tracker

The purpose of this form is to help the members of the [Invasive Catfish Workgroup](#) (ICW) compile and organize past, on-going, and future projects or publications into one space. This Project Tracker will allow the group to better understand the work that members are conducting on invasive catfish in and around the Chesapeake Bay. This information will help the ICW be more efficient in where the group directs its efforts moving forward by preventing overlap of efforts, identifying collaborative opportunities, and highlighting knowledge gaps.

If you have any questions or concerns while filling out the form, please contact the Sustainable Fisheries GIT Staffer, Christina Garvey christina.garvey@noaa.gov.

Are you currently a member of the ICW?

☐ Yes

☐ No, and do not plan to be

☐ No, but am interested in joining

Project Type

Choose ▾

Where is your project/research focused?

☐ Virginia

☐ Maryland

Focus Topic

- ☐ Population Dynamics
- ☐ Control Strategy
- ☐ Ecological Impacts
- ☐ Socio-economic impacts
- ☐ Decision Support Tools
- ☐ Other: _____

Title

Please provide the full title for your project or publication

Your answer _____

Status

- ☐ Complete/Published
- ☐ Active/Ongoing
- ☐ Not started

Lead Institution

Your answer _____

Request for Participation

Next Steps

1. Compile & Organize entries
2. Analyze results
3. Identify knowledge gaps & path forward
