Assignment: Editorial Board/GITs

15. STAC comments

Note: GITs should consider potential revisions to their outcomes based on STAC recommendations if possible at this stage, and consider STAC's recommendations in developing the Management Strategies.

Assignment: Goal Implementation Teams

16. Numerous comments on Principles to be considered by IRC and Editorial Board

Assignment (text): Editorial Board; **Assignment** (policy): IRC. **Discussion at IRC:** Post PSC retreat.

BIN #3: Issues raised in comments that the IRC recommends do not necessitate changes or additions to the Final Agreement.

- Some issues in Bin #1 or #2 will be moved down into Bin #3.
- Additional issues will be included in Bin #3 from both public and partner comments.
- This Bin would include issues raised that Partnership believes could be considered in developing Management Strategies and/or revising CBP Governance Document.

1. Fracking

Decision: The IRC decided at the March 26, 2014 conference call that fracking should not be included in the final Agreement because each affected state is already addressing it and the Land Use Workgroup is exploring the issue for possible consideration as part of the Midpoint Assessment. IRC representatives also did not want such a topic to detract from the importance of decision-making on issues they believe the PSC can reach agreement on for the Final Agreement.
