

2025 WIP Outcome

Outcome: *By 2025, have all practices and controls installed to achieve the Bay's dissolved oxygen, water clarity/submerged aquatic vegetation and chlorophyll-a standards as articulated in the Chesapeake Bay TMDL document*

Science needs:

- Exploration of alternative verification methodologies, including numerical values for credit duration
- Greater understanding and application of social science to address implementation barriers and advance implementation
- Updated science and data for CAST 2021
- Incorporation of monitoring and trends data into assessing progress towards outcome
- Quantification and integration of co-benefits into decision support tools to assist with planning and implementation
- Understanding climate resilient BMPs in Ag and Urban sectors
