

# PRELIMINARY VISUALIZATION OF PHASE 6 RANGING SCENARIOS

Presentation to the Modeling Workgroup

October 4, 2016

John Wolf

# OVERVIEW

- Visualize spatial arrangement of N, P, and TSS yields associated with P6 of the Watershed Model and expected Deep Channel responses
- Interactive – user can pan, zoom and access nutrient/sediment details of a particular LRSeg (yields) or Bay segment (attainment)
- Scenarios include AllElse and Point Source loads/yields
- Data from CBP Modeling Team
- Functionality and data will evolve

# TWO FLAVORS

## A

- Preconfigured side-by-side presentation of alternative scenarios
- Consistent
- Views can be synched

## B

- Custom layer selection
- View scenarios alongside other Model layers
