

## **THRIVING HABITAT, FISHERIES & WILDLIFE**

Blue Crabs - Brook Trout -  
Fish Habitat - Fish Passage  
- Oysters - Stream Health  
- Submerged Aquatic  
Vegetation (SAV) - Wetlands

**Chesapeake Bay Program**

*Science. Restoration. Partnership.*

Combines work previously under  
two GITs: Habitat, and Sustainable  
Fisheries

## Blue Crabs

Achieve a sustainable Bay-wide blue crab fishery through cross-jurisdictional coordination that supports healthy blue crab populations and thriving fish communities.

**Chesapeake Bay Program**

*Science. Restoration. Partnership.*

# Brook Trout

Protect and enhance brook trout within the Chesapeake Bay watershed by increasing occupancy, abundance and resilience to changing environmental conditions.

**Chesapeake Bay Program**  
*Science. Restoration. Partnership.*

## Fish Habitat

Achieve and maintain suitable shallow water fish habitat in tidal and nontidal areas for key species through focused water quality conservation and restoration improvements informed by assessments of habitat and fisheries information.

**Chesapeake Bay Program**  
*Science. Restoration. Partnership.*

## Fish Passage

Improve habitat and water quality while creating more resilient and sustainable populations of fish and other aquatic organisms by removing barriers throughout the Chesapeake Bay watershed's coastal and freshwater rivers and streams.

**Chesapeake Bay Program**

*Science. Restoration. Partnership.*

# Oysters

Increase ecosystem benefits from oysters through reef habitat restoration, sustainable harvest and aquaculture.

**Chesapeake Bay Program**  
*Science. Restoration. Partnership.*

## Stream Health

Improve and protect local stream health and function, including their living resources and ecosystem services throughout the watershed, using the best available science to inform land management, planning and conservation.

**Chesapeake Bay Program**

*Science. Restoration. Partnership.*

## Submerged Aquatic Vegetation (SAV)

Sustain and increase the habitat and ecosystem benefits of SAV in the Chesapeake Bay. Achieve and sustain the outcome of 196,600 acres of SAV Bay-wide necessary for a restored Bay.

**Chesapeake Bay Program**  
*Science. Restoration. Partnership.*

**Chesapeake Bay Program**  
*Science. Restoration. Partnership.*

## **Wetlands**

Restore, create, enhance and protect wetlands to support people and living resources, including waterbirds and fish, and provide water quality, flood and erosion protection, recreation and other valuable benefits to people.

# Goal Team Points of Contact

## Co-Chairs:

Kevin Schabow (NOAA)

Becky Gwynn (VADWR)

## Coordinators:

Chris Guy (UFWS)

## Staffers:

Christina Garvey (CRC)

Nick Staten(CRC)

**Chesapeake Bay Program**  
*Science. Restoration. Partnership.*

## Workgroup Chairs

- Blue Crabs: Ingrid Braun-Ricks (PRFC)
- Brook Trout: Daniel Goetz (MD DNR), Katie Ombalski (Woods & Waters)
- Fish Habitat: TBD
- Fish Passage: Ray Li (USFWS)
- Oysters: TBD
- Stream Health: Alison Santoro (MD DNR), Brock Reggi (VA DEQ)
- SAV: Brooke Landry (MD DNR), Erin Shields (CBNERR-VA)
- Wetlands: Pam Mason (VIMS), Nancy Schumm (City of Gaithersburg)
