

Research Outcome: Relevant MAs

- MA2: Understand the influence of contaminants in degrading the health, and contributing to mortality, of fish and wildlife
- MA3: Document the occurrence, concentrations, and sources of contaminants in different landscape settings
- MA4: Synthesize and promote science to help prioritize options for mitigation to inform policy and prevention

Relevant CBP Actions related to STAC Workshop

- Enhance Interaction with Stakeholders for Contaminant Information
- Take advantage of Phase 3 implementation, 2-yr milestones – *other opportunities beyond this?*
- Enhance Communication Materials to Inform Decisions
- Compile results and expand BMP studies of contaminant mitigation and relation to nutrients and sediment reductions (co-benefits)
