

Ginny Snead, PE, CFM

Ginny Snead is a water resources engineer with more than 25 years of consulting and state government experience, specializing in water planning, floodplain management, engineering, and policy in Virginia and in the Chesapeake Bay watershed. She currently leads the Environmental and Water Resources Division of A. Morton Thomas (AMT), a Mid-Atlantic civil engineering and planning firm. Her consulting practice centers on MS4 clients including VDOT and municipalities in Virginia and increasingly includes work in the intersection of stormwater and floodplain management. Her prior experience includes directing the Office of Stormwater at the Virginia DEQ and managing the Office of Regulatory Programs at the Virginia DCR which governed both the NPDES (MS4, Construction General Permit) for stormwater and the TMDL implementation plan programs, and included the Virginia Erosion and Sediment Control Program, the Virginia Stormwater Management Program (and Virginia Stormwater BMP Clearinghouse), the Chesapeake Bay Preservation Act Program and Nutrient Management. Ms. Snead led the state team negotiating Virginia's 2013 MS4 NPDES permits with U.S. EPA Region III which still serve as the basis for MS4 permits in the Commonwealth. She has served as project manager and technical lead on projects including stream restoration, BMP design/retrofit, MS4 compliance, as well as on FEMA CRS support. She currently serves as an at-large member of the Chesapeake Bay Urban Stormwater Workgroup and has served in various capacities on the work group since 2011. Ms. Snead is Chair Emeritus for the Alliance for the Chesapeake Bay board, a non-profit focused on improving the health of the Bay, and she serves on the board of the Virginia Water Resources Research Center at Virginia Tech.
