10:05 Announcements and Updates

- Ad Hoc Verification Team
- CAST 2021

10:20 Maintaining Climate Resilience of Stormwater Practices Update. David Wood, CSN (Attach. A, B & C)

David will present the key findings from the next two memos in a four-part series on improving the climate resilience of stormwater management practices. The first will summarize current design standards and ongoing resilience efforts in each state, the second will present findings from a series of future climate projections across the Chesapeake Bay Watershed. Workgroup members will be asked to review and provide feedback on each memo.

10:50 Recommendations for Approving Floodplain Restoration Protocols. David Wood, CSN (Attach. D & E)

David will review the responses to comments and major changes to the draft memo that was presented to the USWG in May. USWG will be asked to approve the recommendations.

11:30 Impervious Cover Removal BMP. David Wood, CSN and Norm Goulet, Chair (Attach. F & G)

In April, the USWG discussed the need for clarification for how to track and report impervious cover removal. An ad hoc group was convened to assess past efforts to credit the practice and review options for future reporting. The USWG will be asked to approve their recommendations.
