CBP Point Source Data Application – 2019 update

3 September 2019

Megan Thyng

Agenda

- Updates
- 2019 Progress submission process
- New features review
- Schedule/Next steps
- Questions

Updates

- Historical data being reconciled with CAST “official” wastewater data
- Several releases addressing bugs/small issues identified in 2018 progress submission process (see Release Notes)
- Feature enhancements
 - “Fix” feature enhanced
 - Upload spreadsheet feature
 - Prior year data available in popup
 - Merging datasets capability

2019 Progress Submissions

Beginning with 2018 Progress, submissions will come through ICIS-NPDES and the hybrid CBPO tool for use with the Phase 6 model. Case-by-case exceptions can be granted for a portion of the data, but it's expected the bulk of the information will come through ICIS-NPDES. Data is due **December 2, 2019** for most jurisdictions with a two-month extension for VA. **For 2019 Progress, it is anticipated that all jurisdictions will use the PS tool for reporting all facility data.**

Non-significant Facilities

Any wastewater treatment facilities reported by jurisdictions under non-significant category and not meeting the above definition are non-significant facilities. In the past, for jurisdictions that did not provide annual DMR data or state-specific default values for non-significant facilities, the estimated one-time data have been added to the annually submitted datasets at the CBPO prior to the progress model runs. Starting with the 2014 progress data submission, jurisdictions are required to provide data, either measured DMR data or state-specific default values, for all their significant and non-significant facilities in their annual progress run data submission. **CBPO's Point Source data submission application allows the states to access DMR data for nonsignificant facilities if data are available.** If there are no annual DMR available for some or all non-significant facilities, the state estimated one-time data or default state-specific values could be used for these non-significant facilities in the report; **these are available in the Point Source data submission application.** CBPO staff will provide the states with previous, **if necessary**, non-significant input decks to assist in this effort. This approach will let the jurisdictions have full control and understanding of what data are included in the wastewater input decks for each model run.

Application demo

Reminders:

- Any changes you make in the application will NOT be incorporated into ICIS-NPDES or NetDMR
- Email thyngemegan@epa.gov for a login

Schedule/Next steps

- CBP finalizes updates to active/inactive data (9/6/19)
- CBP releases dataset merging feature (9/27/19)
- Work individually with jurisdictions (September)
- Reconvene jurisdiction user group (October)
