

AGENDA
Wastewater Treatment Workgroup (WWTWG)
Teleconference
Tuesday, June 7, 2016, 10:00 AM – 12:00 PM
Conference Line: 866-299-3188, code: 267-5715
Adobe Connect: <http://epawebconferencing.acms.com/wwtwg/>

10:00 AM **Welcome, Introductions, and Announcements**—*Tanya Spano (Chair)*

Action Item: Approval of May minutes.

10:10 AM **Covington Industrial Point Source Historical Data** – *Gopal Bhatt, Penn State*

From 1984-1996, the Westvaco industrial wastewater treatment plant in Covington, VA reported an estimated default discharged load, causing a large disparity between observed river water quality monitoring data and point source discharge data in a stretch of the James for that time period. The Modeling Workgroup would like to adjust the loads from that source in the years 1985-1995 based on the monitoring data in order to achieve a better model calibration.

Action Item: The WWTWG will be asked to approve the Modeling Workgroup's process for adjusting loads from the Covington wastewater treatment plant for 1984-1996 based on monitoring data, in order to improve the accuracy of the model calibration.

10:40 AM **Biosolids Task Force Report** – *Karl Berger, MWCOG*

Karl will provide an overview of the Task Force's recommendations for how to address biosolids in the Phase 6 Watershed Model.

Action Item: The WWTWG will be asked to approve the Biosolids Task Force Recommendations. If additional time is needed to review the recommendations, comments and approval will be sought following the meeting.

11:10 AM **New Source Data Collection and Cleanup Update** – *Ning Zhou, VT*

Jurisdictions will be asked to provide updates on their data collection plan and efforts for the new sources, such as spray irrigation, rapid infiltration and large onsite systems.

11:30 AM **Updates and other business**

- Attenuation Panel Update
- Boat Discharge and Pump-out Panel
- Onsite Wastewater Treatment Systems Panel
- Point Source Data Project
- Facility Upgrade Status
- Point Source QAPPs

12:00 PM **Adjourn**
