

# PRELIMINARY VISUALIZATION OF PHASE 6 RANGING SCENARIOS

Presentation to the Water Quality Goal Implementation Team

October 24, 2016

John Wolf

# OVERVIEW

- Visualize spatial arrangement of N, P, and TSS yields associated with P6 of the Watershed Model and expected Deep Channel responses
- Interactive – user can pan, zoom and access nutrient/sediment details of a particular LRSeg (yields) or Bay segment (attainment)
- Scenarios include AllElse and Point Source loads/yields
- Data from CBP Modeling Team
- Functionality and data will evolve

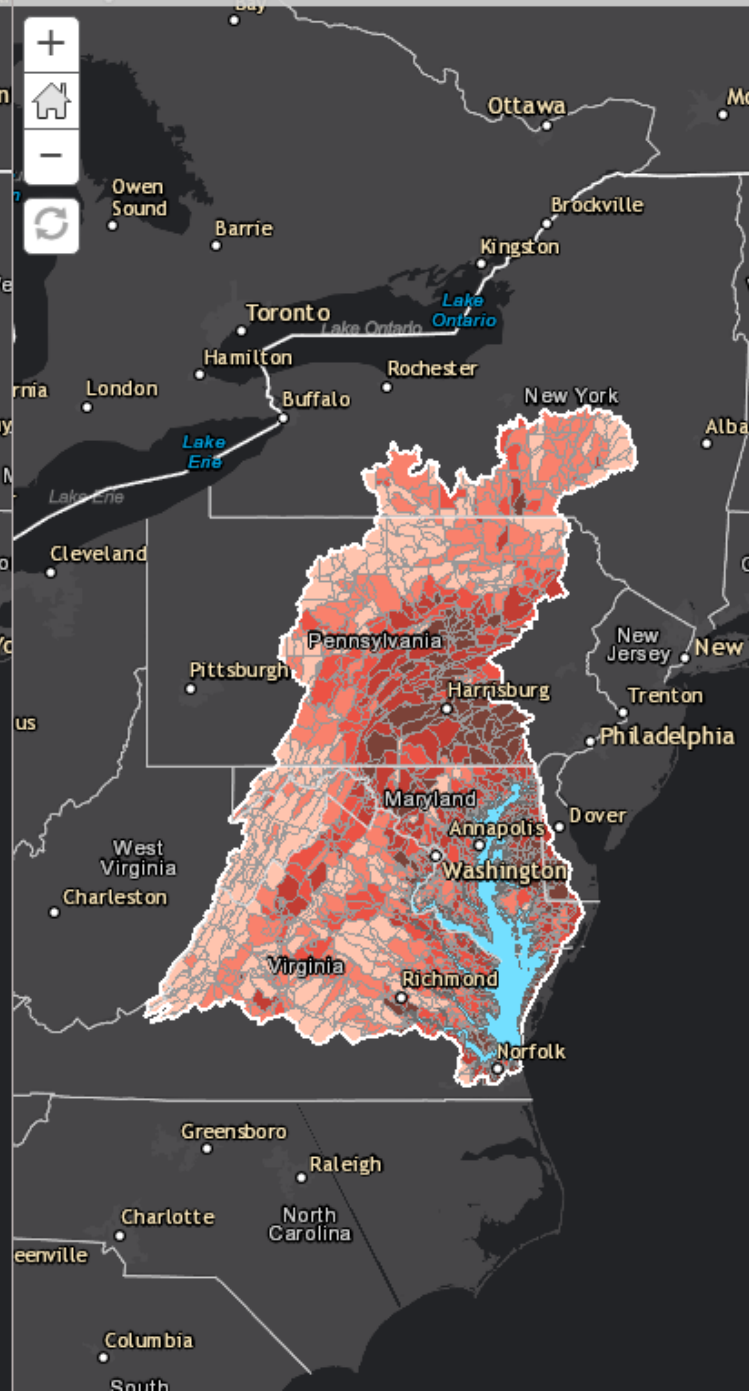

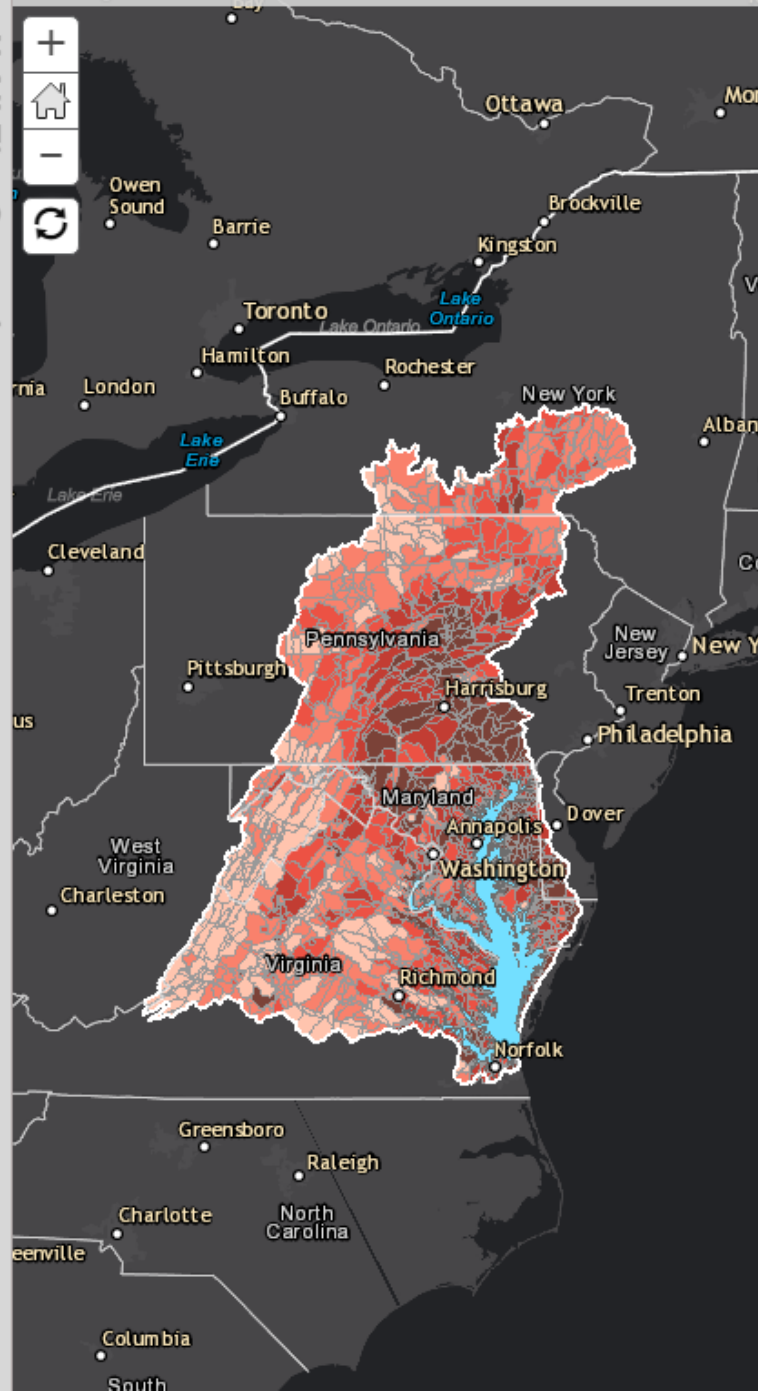

# GEOSPATIAL VIEWERS - TWO VERSIONS

## A

- User selects scenarios of interest
- Preconfigured side-by-side presentation of alternative scenarios
- Consistent presentation
- Views can be synced

## B

- Custom layer selection
- View scenarios alongside other model layers

## Layer List

### Operational Layers

- ☒ Detailed Streams (scale dependent)
- ☒ Chesapeake Watershed Boundary
- ☒ World Boundaries and Places
- ☒ Modeling Reference Layers
  - ☐ Wastewater Facilities
  - ☐ Counties
  - ☐ 12-Digit Watersheds
  - ☐ MS4
  - ☐ P5.3 Land-River Segments
  - ☐ P5.3 Land Segments
  - ☐ P5.3 River Segments
  - ☐ Tributary Strategy Basins
  - ☐ CSS
  - ☐ Federal Facilities
  - ☐ P6 Land-River Segments
  - ☒ Ranging Scenarios

N 1985 All Else
