SUMMARY

6th Generation Family Farm - Beef Cattle Producer

Our family operates a 6th generation cow-calf operation with approximately 150 head. We annually keep 60-80 cows/heifers and sell 50+- feeder steers and heifers annually. We harvest our own hay and rotationally graze pastures. We received the 2021 Clean Water Farm Award for our BMP installations and conservation efforts.

Estes Company- Agriculture-Agronomy Services/Consulting

In 2017 I began working as an independent agronomy specialist providing agronomy services to farmers, farm cooperatives and farm suppliers as requested. This service includes nutrient management plans, farm management plans, and technical investigations and resolution of agronomy issues and complaints. I also conducted training in agronomy for agronomy employees (150) in Virginia, North Carolina, and Kentucky. I am a certified as a Crop Adviser (American Society of Agronomy) and in Nutrient Management Planning with the Commonwealth of Virginia.

Government Affairs Specialist

In 2019 I began representing the Virginia Cattlemen's Association as a Government Affairs Specialist and consultant. I work with producers, industry leaders and partners to influence public policy at the state level. I work directly with General Assembly members and the Executive Branch agencies in order to address the legislative, regulatory, environmental and social needs of the beef cattle industry in Virginia.

Agronomy Specialist with Cooperatives

For six years after retiring from Virginia Tech in 2010 I worked for Southern States Cooperative as well as Orange Madison Cooperative as an agronomy specialist providing inputs, including fertilizer, seed, and crop protection products and technical advice to Virginia producers. I was a troubleshooter and agronomy specialist charged with investigating problems, complaints, and providing technical training for producers and agronomy employees. My work took me all over Virginia including the Shenandoah Valley, Northern and Southern Piedmont and the Coastal Plains.

Virginia Tech Faculty, College of Agriculture and Life Sciences.

As Assistant Director of Virginia Cooperative Extension (VCE) I was the state leader for Agriculture and Natural Resource (ANR) programs This included coordination of the Sustainable Agriculture Research and Education programs in Virginia.

I provided leadership for the educational programs supported by Extension specialists in the Colleges of Agriculture and Life Sciences, Natural Resources, Veterinary Medicine, and for the Agriculture and Natural Resource Extension Agents stationed in 107 counties and cities.
