

Shorelines and Tidal Wetlands

- Research and compile existing information on shorelines and tidal wetlands
 - Potential data sources include:
 - SERC Study (Tom Jordan)
 - VIMS shorelines study
 - NOAA Coastal Change Analysis Program
 - Sea Level Affecting Marshes Model (SLAMM)
 - NOAA National Assessment of Coastal Vulnerability to Sea Level Rise
 - Chesapeake Bay Living Resources
- Determine applications of changing shorelines and tidal wetlands to climate change and forage
- Compiled data can potentially be included in the Chesapeake Atlantis Model
