

# C-StREAM Summer 2023 Internships

Applications for Summer 2023 are now available!

Chesapeake Research Consortium's C-StREAM program is designed to create pathways for underrepresented students to pursue careers in environmental research and management. We are preparing for both virtual and/or in-person experiences and are committed to providing safe, enriching, and worthwhile experiences to all our summer 2023 C-StREAM Fellows.

**There are 10 summer internship opportunities available across a wide variety of environmental topics:**

- Capacity Building
- Tributary Basin Summary Reporting
- Internship Best Practices
- Habitat Science
- Community Partnerships
- Impacts on Chesapeake Shallow Aquifer
- D.C. Water Quality Database
- Toxic Contaminant Workgroup Research (PFAS "Forever Chemicals")
- CBPO Community Level Partner Organization Research
