# **Reducing Excess Nitrogen, Phosphorus & Sediment (RENPS) Outcome**

---

---

---

# RENPS Outcome

Implement and maintain practices and controls to reduce nitrogen, phosphorus and sediment. These reductions are necessary to achieve the applicable water quality standards, as described in the Bay TMDL. Those water quality standards support living resources and protect human health, as required by the Clean Water Act.

---

---

---

# RENPS Targets

- Through 2030, signatories will continue to accelerate completion of all interim water quality planning targets through implementation of Chesapeake Bay Watershed Implementation Plans, two-year milestone commitments and other innovative strategies to achieve and maintain reduced levels of nitrogen, phosphorus and sediment.
- By December 31, 2030, revise the planning targets approved by the Principals' Staff Committee for nitrogen, phosphorus and sediment, incorporating the latest watershed modeling, monitoring data and research findings, and develop new or amended Watershed Implementation Plans to meet the updated targets by 2040.
- Demonstrate net reductions in nitrogen, phosphorus and sediment through multiple lines of evidence, including modeling and monitoring data.

# Accountability: CBWA Time Horizon

The MB agreed via consensus to adopt a six-year cycle for Management Strategy implementation.

MS Develop. (up to 18 months)		Management Strategy (6 yrs)						Management Strategy (6 yrs)						Agreement Revision	
		Program Evaluation & Strategy Updates													
2026	2027	2028	2029	2030	2031	2032	2033	2034	2035	2036	2037	2038	2039	2040	

The Program will **report progress to the public and update work plans on a shorter-term basis** for each Outcome in accordance with adaptive management.

# **CBP Structure and Governance**

# CBP Structure and Governance

## Chesapeake Bay Program Governance & Accountability Recommendations

In response to the 2024 Chesapeake Bay Executive Council [Charter & Course Revised 2024 Charter](#) to strengthen and streamline the partnership, the ad hoc Governance and Accountability Team prepared—and the Principals' Staff Committee now recommends—the following actions to address its priority challenges, “Priority Setting and Decision-Making” and “Roles and Responsibilities.”

The Governance and Accountability Team has also developed initial considerations for four additional challenges—“Complexity and Structure,” “Transparency,” “Accountability and Adaptive Management,” and “Communication and Coordination”—but these recommendations remain under deliberation and are therefore not included in this document.

### Priority-Setting and Decision-Making Recommendations

- 1) A Policy Steering Committee should provide strategic direction for the partnership by establishing and implementing a collaborative priority-setting framework.
- 2) Clarifying decision-making authority is recommended to enhance operations across all levels of the governing structure, particularly when considering how best to streamline outcome implementation actions and delegate decision-making.
- 3) Federal agency coordination should be strengthened at each level of the governing structure, including transparency in decision making.
- 4) Consensus-based decision-making should be evaluated to determine whether alternative methods could be more effective at different levels of the partnership, while acknowledging the necessary balance between efficiency and equitability.

### Role & Responsibility Recommendations

- 1) Minor updates to the roles and responsibilities of the Chesapeake Executive Council are recommended to emphasize their strategic direction, policy-setting and public-facing functions.
- 2) Major updates to the roles, responsibilities and operations of the existing Principals' Staff Committee are recommended to strengthen its functions as a body of politically appointed or organizational executives. This recommendation results in a significant shift in the focus of the Principals' Staff Committee to include strategic direction and priority setting, while focusing less on approving operational decisions.
- 3) Major updates to the roles and responsibilities of the program's operational and implementation-focused elements are recommended to strengthen workflow and coordination.
- 4) Updates to the roles and operations of the Advisory Committees are recommended to increase their engagement across the partnership and to encourage greater collaboration amongst themselves.

These governance recommendations were approved by the Principals' Staff Committee on November 6, 2025.

## Chesapeake Bay Program Structure Recommendations

To fulfill the 2024 Chesapeake Bay Executive Council [Charter & Course Revised 2024 Charter](#) to strengthen and streamline the partnership, the Principals' Staff Committee has identified two primary structural focus areas: **Program Leadership** and **Program Implementation**. Restructuring these areas will enhance the efficiency, coordination and effectiveness needed to implement the *Chesapeake Bay Watershed Agreement*.

By **July 1, 2026**, the Principals' Staff Committee will finalize the membership, leadership, responsibilities and decision-making protocols associated with these two structural components. However, to align with the revised *Chesapeake Bay Watershed Agreement* and ensure timely delivery of Management Strategies, the partnership will begin preparing for—and transitioning to—the new Goal Team structure following the December 2, 2025 Executive Council meeting.

These structural components will reflect the partnership's governance recommendations to ensure both efforts are aligned to create a more effective and streamlined governance and structure.

A team led by the Management Board Chair will implement the structure and governance revision and report progress to the PSAC for final approval. Each signatory may, at their discretion, appoint a Management Board representative (or designee) to the implementation team. This team will determine roles and responsibilities, leadership and membership, duration of membership, and operation for the structural components below, consulting with the existing PSAC, Goal Implementation Teams, Advisory Committees and Program Support teams as appropriate.

Leadership in various structural areas are proposed and documented in a timely manner for the consideration of the Principals' Staff Committee.

# Looking Ahead Towards July 1, 2026

- Nominations for two Clean Water Goal Team Co-Chairs received. To be confirmed at WQGIT on Jan 26th and Management Board on Feb 12th.
- Management Board is working on Structure and Governance revisions to be approved by June 30.
- Management Board is discussing Management Strategy development, including a template approved by June 30.
- More detailed timelines and slides are posted from the Management Board's [Dec 11](#) and [Jan 15](#) meetings.

# DRAFT TIMELINE & FOCUS

Through 2030 continue to **accelerate completion** of all interim water quality planning targets (Target #1)

**Demonstrate net reductions** with multiple lines of evidence (Target #3)
