

Chesapeake Bay Program  
*Science. Restoration. Partnership.*

# Agriculture Workgroup

March 2026  
Hybrid Meeting

# Agenda

---

---

- 1 AgWG Leadership Transition**
- 2 Strategies For Success: Collaborative Watershed Restoration**
- 3 Bay in the Balance Takeaways**
- 4 BREAK**
- 5 Group Engagement Activity**
- 6 BMPs – crediting; remote sensing-based verification**

**1**

# **AgWG Leadership Transition**

---

---

# Context

- Management Board **approved new Goal Team Co-Chairs at their Feb. 12th meeting:**
  - Greg Sandi, Chief, Watershed Restoration Planning Division, MD Department of the Environment
  - Lee McDonnell, Chief, Science Analysis and Implementation Branch, EPA CBPO
- The AgWG leadership team received confirmation from the Clean Water Goal Team Co-Chairs that **workgroups are permitted to move forward with the selection process for filling leadership vacancies.**
- **The AgWG will be asked to approve Jenn Fetter, Penn State University, as the next Vice Chair of the AgWG.** With this approval, Caitlin Grady, GWU, will assume the role of Chair.

\***NOTE:** Actions related to confirming new workgroup members are still paused. We will take the appropriate next steps to fill remaining AgWG vacancies when granted permission to do so.

---

---

# Vice Chair Nominee – Jenn Fetter

- Director, Center for Ag Conservation Assistance Training, Penn State Extension
- Previous roles with Penn State Extension:
  - Senior Extension Educator and Water Resources Program Team Lead
  - Youth Development/4-H Extension Educator
- Prior to her time at Penn State Extension, Jenn was an adjunct Professor of Biology.
- In 2025, Jenn received the President's Award from the Pennsylvania Association of Conservation Districts.
- View [Jenn's full bio](#) including research grants, awards, publications, and more!

**Thank you, Kathy!**

# **Strategies For Success: Collaborative Watershed Restoration**

# Overview of CAP Case Study Kate Beats, PA DEP

January 2026

## Pennsylvania's Phase 3 Watershed Implementation Plan and Countywide Action Plans:

A CASE STUDY IN COLLABORATIVE  
WATERSHED RESTORATION

Pennsylvania  
Department of  
Environmental Protection

**Questions?**

3

# **Bay in the Balance Takeaways**

# **Summary of Bay in the Balance Takeaways**

Caitlin Grady, Incoming AgWG Chair

---

---

---

# Facilitated Discussion

- In-person (in pairs) and virtual participants are asked to reflect on the following:
  - Of the many topics discussed this week, which are most in line with the scope of the Ag Workgroup?
    - Which of these has the greatest opportunity to “move the needle” in the overall Bay restoration effort?
  - What role does the Chesapeake Bay Program Partnership have in advancing the priorities outlined over the course of the conference?

# 4

## **BREAK- 10 Minutes**

*While on break, reflect on the following questions for our next discussion:*

- **QUESTION 1:** *What is one project you have led or supported in the last year related to agriculture in the Chesapeake Bay Watershed that gives you the greatest sense of pride?*
- **QUESTION 2:** *What is one thing related to agriculture in the Chesapeake Bay Watershed that you are most looking forward to in the coming year?*

5

# Group Engagement Activity

---

---

# Get to know the AgWG...

- It's been **six years since the last in-person AgWG meeting!**
- To get to know each other a bit more, in-person and virtual meeting participants will share their responses to the following questions:
  - **QUESTION 1:** What is one project you have led or supported in the last year related to agriculture in the Chesapeake Bay Watershed that gives you the greatest sense of pride?
  - **QUESTION 2:** What is one thing related to agriculture in the Chesapeake Bay Watershed that you are most looking forward to in the coming year?

# **BMPs – Crediting and Remote Sensing-based Verification**

# **(Re) Evaluating Ag BMPs for CBP's Suite of Modeling Tools**

---

---

# Framing

- Partnership decision-making related to CBP ag BMP crediting, reporting and verification occurs at the Agriculture Workgroup.
- Ensuring model credit is based on the best available science is an important part of accurately capturing the positive impacts of conservation actions.
- We created a resource to concisely show ag BMPs (and in some cases BMP groups) currently credited, the year credit was last reviewed, and links to source material
  - BMP Quick Reference Guide

# What we're doing today

- Walkthrough of the spreadsheet
- Quick discussion of key questions
  - What is missing?
  - What needs to be revised?
- Next steps
  - Feedback "due date": **Wednesday, March 25th**

# **Remote Sensing-based Verification of BMPs**

---

---

# Bottom line up front

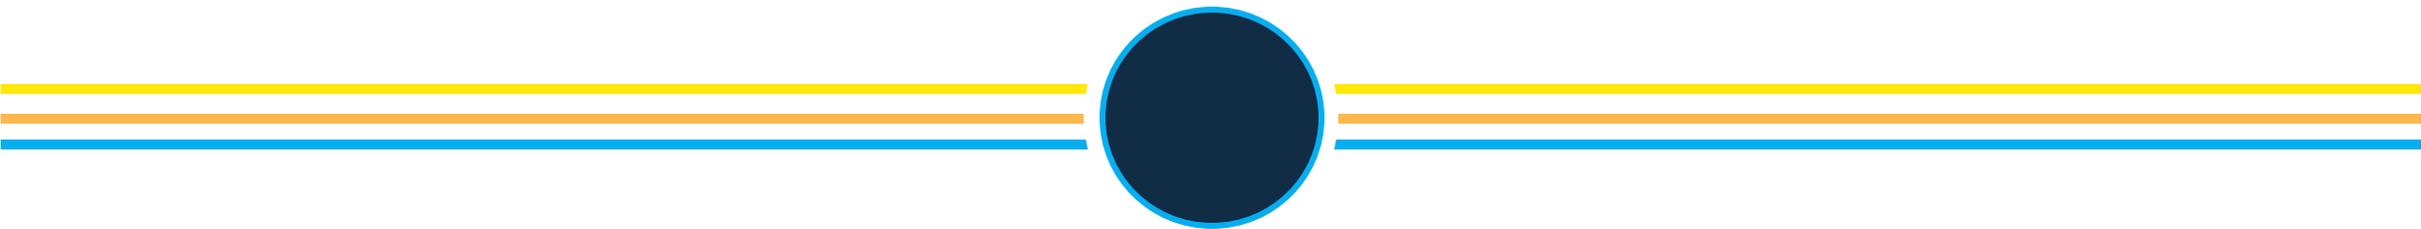

- "Leveraging technology to enhance BMP verification" is a listed priority of the Agriculture Workgroup
  - Remote sensing technology presents an opportunity to reduce the overall BMP tracking, reporting, and verification burden across the partnership
- We need to discuss priorities
- EPA is willing to allocate resources to this effort
  - Priorities: watershed-wide approach for cover crop and tillage

---

---

# What we're doing today

- Walkthrough of the spreadsheet
- Quick discussion of key questions
  - Thoughts on initial assessment – what did we get right and what did we get wrong?
  - What is the partnership's appetite for pursuing a watershed-wide approach to tracking, reporting, and verification (for specific BMPs)?
    - Which are your priority BMPs?
    - How would we quantify resources saved?
- Next steps
  - Feedback "due date": **Wednesday, March 25th**

# **Wrap Up & Closing Remarks**

---

---

# Anything else?

- Send to Caroline Kleis ([Kleis.Caroline@epa.gov](mailto:Kleis.Caroline@epa.gov)) for inclusion in “Recap” email

---

---

---

# Thank you!
