Q&A: Decommissioning of NEIEN Node

Watershed Technical Workgroup
September 3, 2026

Announcements

- The CBP NEIEN node has been decommissioned.
- The progress reporting portal on CAST now allows users to upload individual XMLs as well as a zip file containing many XMLs.

Points of Clarification

- **How does it work?**

The ZIP upload feature works just like the existing XML upload process. Simply package one or more XML files into a ZIP file and upload it through the **same submission page** you use today.

- **Who gets an email and how many?**

A **single** validation email is sent for **each** XML file contained in the ZIP file. These emails are sent to the **Sender Contact** specified in the XML file.

Points of Clarification

- **Does the zip file have a size limit?**

Yes. The current upload limit is **1 GB**, which applies to both individual XML uploads and ZIP file uploads.

- **Is there a limit to how many XMLs can be in one zip file?**

There is no specific limit on the number of XML files that can be included in a ZIP file. You may include as many files as needed, provided the total ZIP file size does not exceed **1 GB upload limit**.

Points of Clarification

- Any other questions?
