

Jeff Colella

Wyoming Valley Sanitary Authority Stormwater Division Manager

Phone: 570-239-2147, 825-3416 x5280

Email: jeff.colella@wvsa.net

Starting my 25th year at Wyoming Valley Sanitary Authority, I have worked in and founded a number of departments for the WVSA. I began my career in the wastewater operations department, spent a number of years in our road collections department where I helped begin our camera and inspection department. In 2014, I was asked to build a GIS department to inspect, log and locate all the WVSA 36 sewer towns assets. Since 2017, I have overseen the WVSA Stormwater Division, that is made up of 32 municipalities and 170,000 residents, to improve stormwater management in the NEPA region. Included in this division, is the execution of a joint pollutant reduction plan for all 32 municipalities that will keep us in compliance with all the current MS4 regulations. I hold a B.S. in education from Penn State University, numerous certifications including a Project Management Certification, E4 Wastewater License, CDL, Backflow Certification.
