

Priority Projects

January 16, 2025

Beyond 2025 Projects & Initiatives

- Urgent and additional (not part of GIT/workgroup workplans)
- Critical actions needed to advance the EC Charge in the long-term
- Cross outcome (e.g., climate, people, shallow water)
- Phase 1: B25 Steering Committee Report, Small Groups, Charting a Course to 2025, ERG
- Initial GIT submission deadline of Jan.3, but iterative and dynamic process
- Identified during review of outcomes and addressing “Big Question”
- Goal Teams (and partnership bodies)—continue to identify important projects and strategic needs, working together.

Beyond 2025 Projects Process Schedule

- January 3: Small, urgent list of projects to be discussed at January 16 Management Board Meeting
- Goal Teams—continue to identify important projects and strategic needs, working together.
- Revisit iteratively with renewed focus in April/May

Questions to Consider:

- What are next steps for implementing and tracking these?
- What level of approval is needed by the MB? How will these and future efforts be “prioritized”?
- Where is there opportunity for cross-GIT cooperation?
