PROFESSIONAL SUMMARY

Agronomist and business leader with 25+ years of experience helping farms improve profitability, sustainability, and regulatory compliance. Founder of Rosetree Consulting LLC, serving 400+ farms annually with expertise in field scouting, nutrient management, precision ag, and conservation planning. Known for translating complex data into practical and actionable solutions, leading high-performing teams, and advancing 4R Nutrient Stewardship to enhance farm productivity and reduce nutrient loss.

PROFESSIONAL EXPERIENCE

Owner, Sr. Agronomist & Regulatory Planner **Rosetree Consulting, LLC** **Oct 2009 – present**

- Founder and leader of a trusted agronomic consulting firm serving 400+ farms annually across Pennsylvania and surrounding states
- Deliver science-based agronomic services including soil testing, crop scouting, nutrient management planning, precision ag, conservation planning, CAFO permitting, and odor management
- Provide individualized crop and fertility plans that improve profitability, ensure regulatory compliance, and support environmental stewardship
- Educate producers through annual grower meetings, field days, and industry presentations, positioning Rosetree Consulting as a thought leader in practical, research-driven farm management
- Oversee and mentor a team of 10-12 agronomists and staff (varies seasonally), managing workloads, client service delivery, and professional development

Co-Executive Director **Pennsylvania 4R Nutrient Stewardship Alliance** **Jan 2014 – present**

- Collaborate with producers, agronomists, industry leaders, regulatory agencies, and universities to advance the 4R framework (Right source, Right rate, Right time, Right place)
- Lead outreach, field trials, and educational programs that demonstrate how responsible nutrient management enhances farm profitability while protecting soil health and Pennsylvania's water quality
- Advocate for science-based practices that align production goals with environmental sustainability, connecting research, regulation, and practical implementation
