Expected Number of Survey Takers: 25 3 Advisory Committee Chairs 6 GIT Chairs 7 Jurisdictions + 1 CBC 8(?) Federal Agencies **Actual Number of Survey Takers: 11 Majority In Favor of Inclusion Dissenting Opinion Majority Requires Change, or Split Positions** We could support this Yes, this language is okay No, we cannot support including this language with minor to include in the public language in the public draft; it is a show draft (even if choice is to stopper for our participation in the changes (please, Agreement (beyond not participating in a not participate in indicate changes Management Strategy). Management Strategy). below). **Blue Crab Abundance Outcome** 10 0 1 Comments: abstain, no position **Blue Crab Management Outcome** 7 1 3 Comments: Needs more specificity Important but seems like it could be combined with #1 abstain, no position **Oyster Outcome** 8 0 3 Comments: Define "restore" - to what level? abstain, no position we would support 8 tributaries to the extent possible with available funding. 7 **Forage Fish** 0 4 Comments: Too vague abstain, no position

not an outcome, more a commitment

if this is linked to the completion of the AFMFC scientific study. (did not indicate if what)

Fish Habitat Outcome 4 1 6

Comments:

Remove word "tidal" - there is an opportunity to connect habitats of tidal and non-tidal portions of tributaries for species such as shad, herring and eels that travel throughout both.

Too vague

can support only if "tidal" is m aintained before tributaries

for CAC please make it clearer for the general public

needs to be more quantitative - too general

Wetlands Outcome 9 0 2

Comments:

do not need language about land use types

need a better understanding of how these numbers were generated

SAV Outcome 8 1 2

Comments:

insert "measured against a goal of" instead of "achieving" 90,000 acres need a better understanding of how these numbers were generated

Forestry Outcome 8 0 3

Comments:

Need more information to know if acre or community-based outcome is better

I will support this only if I am provided a goal justification paper describing the outcome, and expansion of urban tree canaopy to 24,000 acres.

Mu Forestry Workgroup never got a full explanation of the goal.

need a better understanding of how these numbers were generated

Healthy Watersheds Goal 9 0 2

Comments:

Depends on outcome language: outcome must describe how this goal will be met

Too vague as written

Public Access Site Development Outcome	8	0	3
Comments:			
Would prefer this goal be specific to water acce	ss only ("Increase public access by adding 300	0 new water access sites by 2025, coll	ectively
providing opportunities such as boating, swimm	, , , , , , , , , , , , , , , , , , , ,	•	•
do not need detail of "tracking from 2010 basel	ine".		·
