CWIP: Milestone Discussion

Jill Whitcomb, PA DEP, Steering Committee Co-chair

2022-2023 Milestone Commitments

▶ CWIP Milestone Commitments will be due to EPA by January 15, 2022.

▶ This includes Programmatic and Numeric Milestone Commitments.

▶ Begin discussion of what the Steering Committee would want to include in the 2-year milestone commitments.

2022-2023 Milestone Commitments

▶ Should be actionable and measurable

▶ Should be able to report progress in an efficient and effective manner

▶ May include beyond the 2-year period – include "ongoing" strategies, not just those that are specific to this time frame

▶ Documents are publicly accessible and will be used to determine rate of progress toward the goal of 6 million pounds of nitrogen reduction

▶ Determine if we should have a more "user-friendly" narrative that goes along with the commitments (Communications Workgroup assistance?)

2022-2023 Milestone Commitments

▶ Questions to be asked and deliberated by the Steering Committee and CWP for Programmatic Milestones:

▶ What are the high-level priority initiatives? (e.g. Communications/Outreach, Funding and Resources, Reporting and Tracking, etc.)

▶ What specifically can we achieve during this period?

▶ What are the performance targets / metrics?

▶ Who are the responsible parties/partnerships?

▶ What is the geographic location?

▶ What is the expected timeline?

▶ What are the potential implementation challenges or recommendations?

▶ What resources are available?

▶ What resources are needed?

2022-2023 Milestone Commitments

▶ Questions to be asked and deliberated by the Steering Committee and CWP for

Numeric Milestones:

▶ Which BMPs will the numeric milestones focus on? What is the expectation from EPA?

▶ Identify how we will show the trajectory

▶ Link Action Items from the Programmatic Milestones to each BMP identified in Numeric Milestones to show connection.

Next Steps

▶ Begin to identify the main priority initiatives (buckets) throughout the CWIP

▶ Begin to identify actionable items for the next two-year period based on the CWIP

▶ Begin to identify the key parties/partners

▶ Begin laying out trajectory and annual targets for BMP implementation for numeric progress

▶ Provide the basic programmatic and numeric milestone documents with some of these areas filled in for Committee deliberation at September 2021 Steering Committee meeting
