

## [Jurisdiction]

### 2013 Milestones to Reduce Nitrogen, Phosphorus and Sediment

Chesapeake Bay Program  
A Watershed Partnership

#### Introduction

In 2008 the Chesapeake Executive Council charged the seven jurisdictions to develop two-year milestones for pollution reduction to the Chesapeake Bay and to track the pace of restoration. The two-year milestones provide short-term objectives and are part of an overall accountability framework to assess progress on restoration goals. When fully implemented, the seven Watershed Implementation Plans (WIPs) will ensure that practices are in place by 2017 to reduce the load by 60 percent. By 2025, all practices necessary to meet the target loading levels will be in place. The two-year milestones allow jurisdictions the opportunity to adapt implementation strategies outlined in their WIPs as necessary to meet those goals and achieve the Total Maximum Daily Load (TMDL) standard. [Jurisdiction's] 2012-2013 milestone commitments are to reduce nitrogen by xx pounds, phosphorus by xx pounds, and sediment by xx tons by the end of 2013, compared to the 2009 baseline.

#### "Jurisdiction's" Pollutant Reduction Progress and Future Targets by Source Sector

Comment [ST1]: Need contractor to edit to say 2012-2013

Comment [ST2]: Contractor to combine forest and non-tidal atm dep to just say Forest\* and explain that forest includes other sources. Have more variation in colors to distinguish and change title from Point Source to Wastewater. Remove the trajectory line and the box explaining.

### Milestone Highlights:

*Jurisdiction to provide a few sentences to address or clarify the information in the charts above. Sample language: "Jurisdiction's" 2013 milestones for nitrogen is on track to meeting the targets for 2017. Greater reductions for phosphorus will not occur until 2015 due to proposed regulatory changes.*

### Pollutant Reduction Controls, Practices and Actions in 2012-2013 Milestone Targets

*(Highlight key numeric targets or practices from the 12-13 Milestones. This includes actions that are not in the input deck i.e., # of inspections or rain gardens, but still has a numeric target)*

Pollutant Controls, Practices, and Actions		2012-2013 Targets
Agriculture		
Nutrient Management		360,000 acres
Cover Crops		32,607 acres/yr
Streamside Grass Buffers		8,240 acres
Animal Waste Management Systems		572 systems
Heavy Use Poultry Area Concrete Pads		223 farms
Wastewater		
Nitrogen Reduced from 2009 loads		250,000 pounds
Phosphorus Reduced from 2009 loads		30,000 pounds
Urban/Stormwater		
Urban Stormwater Management		47,500 acres
Dirt and Gravel Road Erosion		40,900 feet
Septic Improvements		6,200 systems

For the full details of "Jurisdictions" target implementation milestones, please see  
(EPA to include web link)

### 2012-2013 Commitments *(include some key programmatic milestones and the dates)*

- By July 2012 propose expansion of existing nutrient credit and stormwater offset program.
- Submit all draft Phase II MS4 permits to EPA by December 2012.
- Continue to provide educational brochures and materials to citizens in the Bay watershed.
- Create citywide online stormwater tracking tool.
- Develop a Model Ag Compliance Policy for use by Conservation Districts.

For the full details of "Jurisdictions" programmatic milestones, please see  
"Provide web link here"
