

Elizabeth began her work at the Maryland Department of Agriculture with the Maryland Agricultural Water Quality Cost Share (MACS) program before moving to the Watershed Implementation Program, where she now serves as the WIP Coordinator. She coordinates the tracking and reporting of data across their many Resource Conservation programs, as well as Verification Program, and performs data analysis to support their programs, as well as 24 soil conservation districts, in planning efforts related to TMDL goals and BMP implementation through tracking progress and highlighting additional conservation needs.

She is a current fellow of LEAD Maryland, Class XI, and a certified Nutrient Management Consultant.
