

Krystal Reifer is currently a GIS Analyst at Montgomery County Maryland's Department of Environmental Protection, working primarily on projects pertaining to stormwater and watershed management, storm drain mapping, and impervious surfaces. Ms. Reifer attended the University of Connecticut for both undergraduate and graduate studies, graduating in 2006 with a B.A. degree in Physical Geography and 2008 with an M.S. degree in Natural Resources Management & Engineering, Remote Sensing & GIS Concentration. Her thesis work involved using field and geospatial techniques to investigate geomorphic and human impacts on the biotic integrity of Connecticut streams from multiple spatial scales. Upon completing her graduate degree, Ms. Reifer moved to Virginia and spent 5 years doing GIS work at Amec Foster Wheeler (formerly Amec Earth & Environmental), prior to joining the County in June 2013.
