

NATIONAL ENVIRONMENTAL INFORMATION EXCHANGE NETWORK

Chesapeake Node Codes List

Version 2014.1

August, 2013

Change History

Version	Date	Revision Description
0.5	July 12, 2006	Final Modifications resulting from Technical Walkthrough.
0.9	July 31, 2006	Reverted version above to 0.5 Discussion Points and Virginia Review Modifications Discussion Points and PA Additions Modifications made include: - Tables were in sorted order - Entries in tables were in sorted order - All code table references were standardized to plural (they were mixed) - Synchronized Sections 3 and 4 and removed examples of codes from Section 3 that were moved to Section 4 - added Code List Identifiers to tables identified as codes in the DET - highlighted items for discussion
0.91	September 12, 2006	Modifications from Technical Walkthrough: Removed Binary Object Contents (moved values to Binary Object Types), Binary Object Languages, Land Use Status Codes, NPS BMP Practice Codes, Reach Codes, Subbasin Codes, Waterplan Codes Added Agency Codes and Binary Object Associations to Code Tables Summary in Section 3 and removed City Modified description for Code and added Codes in Section 4.1 Added values to Section 4.4 Removed and/or added values to Section 4.10 Modified description for all Measure Unit Tables Added value to Section 4.13 Added Section 4.16, Horizontal Accuracy Measure Unit Codes Modified description for Section 4.18 Modified description and changed code values to NLCD01 Land Use Codes Added values to 4.26 Removed values from 4.30 Removed and added values to 4.34 All modifications were highlighted in yellow. Green items need additional input from Program team.

1.0	Modifications after November 1, 2006 NPS BMP Teams, November 8 PA NPS BMP Development Team, November 15 technical team review	All 11/1 modifications highlighted in blue 11/8 and 11/15 Modifications after review with PA NPS BMP Repository Developers (11/9) and NPS BMP Node Technical Team (11/15)	
1.0	Minor Modifications prior to distribution for sign off	 Added Maryland Agency Codes to Section 4.1 Agency Codes. Changed Agency Description to Agency Name Added Description and URLs to Section 4.7 Data Source Locations, and Section 4.8 Data Source Names. Removed code of NRCST (no definition found) from Section 4.7 Data Source Locations Removed a reviewer comment from 4.5 County Codes ("Urban BMPs will often be in Cities. Add city to Geographic Location Description?") Removed all highlighting used for previous editing 	
1.0	2/27	- Section 4.1 Added MDE Agency code of 24510 - Section 4.23 Added Measure Unit Codes: YEARS TONS TPY TPAY	
1.0	3/2/2007	- Section 4.26 Added NPS BMP Type Codes of WET and WLD	

1.0	8/30/2007	- Modifications to standardize code values and synchronize with DET and the 8/15/2007 NTG Schema Conformance Report. Reordered renamed codes alphabetically 4.7, 4.8, 4.9, 4.10, 4.11 Prefaced with "BMP" 4.4, 4.5, 4.6 Changed Preface from "NPS BMP" to "BMP" 4.4 Capitalized all codes, added TPR and TPAY 4.11 Capitalized all codes 4.20 Modified per enumerations in shared schema 4.23 Capitalized all codes 4.28 Reference to state postal codes and usps URL - All modified items are highlighted yellow.
1.0	9/27/2007	Modifications from VA DCR after modifying source applications and creating XML file.
1.0	11/27/07	- Standardize BMP Name Type Codes with BMP Component Name Type Codes.

1.0	3/24/2008	 Removed all previous highlighting. Added link to NRCS Practice Names to BMP Name list, removed names in existing list that were federal
		BMP names, and noted BMP Name Types in list.
		- Added link to NRCS Practice Names to BMP Component Name list, removed names in existing list that were federal component names, and noted BMP Component Name Types in list.
		 Note that list of Federal Hydrologic Unit Codes is under development while that shared schema is under development.
		 Changed "Name" to "Description" for BMP Funding Source.
		 Changed "Description" to "Name" for all Measure Units, all Reference Datums, Coordinate Data Source, County, Geographic Reference Point, Geometric Type, Verification Method, and Vertical Collection Method.
		- Better defined Data Source Access Method Codes.
		Combined Data Source Location list with Data Source Names list since there are no Data Source Location Codes, Data Source Location Code Descriptions, Data Source Location Code List Identifiers, or Data Source Name Descriptions in the schemas.
		 Changed the Telephonic Type list to the Telephone Number Type Names list and removed references to Telephone Number Type Code and Telephone Number Type Code List Identifier, which do not exist in the schemas.
		 Changed Verification Method Code and Vertical Collection Method Code to Verification Method Identifier Code and Vertical Collection Method Identifier Code, and Horizontal Accuracy Unit Code to Horizontal Accuracy Measure Unit Code, as per shared schemas.

	1	1
1.0	3/24/2008	 Removed Binary Object Association table as this element does not occur in schemas. Corrected table names in Codes Table Summary. Removed references to required elements (R) for the many elements that are not required but were so listed.
1.0	8/28/2009	 Made all recommended changes of 3/24/08 and 4/17/08 that received no objections. Divided the previous general Federal Hydrologic Unit Code Table into three, one for each order as now available in the schema.
2.0	8/13/10	- Modifications to the following Codes Tables to account for implementation of the NPS BMP schema and input to Scenario Builder: o 4.3, BMP Component Measure Unit Codes o 4.4, BMP Component Names o 4.6, BMP Event Status Codes o 4.9, BMP Land Use Code o 4.10 BMP Measure Unit Codes o 4.11 BMP Names - Standardized measure names on plural in: o 4.3, BMP Component Measure Unit Codes o 4.10 BMP Measure Unit Codes o 4.25 Horizontal Accuracy Measure Unit Codes o 4.33 Vertical Measure Unit Codes
2.1	09/20/2010	- Correction to 4.9, BMP Land Use Code where codes exceeded field lengths.

2.2	12/23/2010	- Synchronize all the codes used in the first production exchange between state and Bay nodes and the codes specification. Tables include: o 4.1 Agency Codes o 4.4 BMP Component Names o 4.6 BMP Event Status Codes o 4.8 BMP Land Use Class Code o 4.11 BMP Names o 4.15 County Codes
2.3	10/11/2011	 BMP & BMP Component Name tables were combined and now include identifiers that specify whether the practice is: Valid as a BMP, BMP Component, or both BMP and BMP Component. TYPE = FED or ST Obsolete tables for BMP Component Name, Type, and Units were removed. BMP/Component names were updated with additional practices anticipated for 2011 progress run submission. Added section 4.32 for Implementation Qualifier Code.
2.4	10/19/2011	- Removed duplicates (porous pavement, cisterns & rain barrels, vegetated roof cover) from table 4.7
2.5	12/29/2011	Added Implementation Qualifier Codes for Regulated land, implementation within Chesapeake bay Portion of the County
2.6	04/09/2012	- Added Land Classes for Urban - Combined Sewer Systems.
2.7	07/31/2012	- Added new BMP & BMP Components from NY Stormwater DB.

2.8	10/22/2012	Added: - units for volume (cubic feet, acre-feet) - verification qualifiers - soil types - Separate BMP name codes for dry detention ponds and hydrodynamic structures. - Missing css land use code
2.9	09/10/2013	Added: additional BMP event status codes: INST – Installed IMSP – Inspected MANT – Maintained
2.10	10/30/2013	Added: Additional land uses: Nurs – nursery Alf – alfalfa
2.11	11/12/2013	Revised existing BMP Name table
2.11	11/22/2013	Added: HUC4 – Four Digit Hydrologic Unit Code HUC6 – Six Digit Hydrologic Unit Code
2.11	11/25/2013	Added: BMP Category Previous BMP

2014.1	08/22/2014 (pending)	Added Implementation Qualifier Codes: IMNF – Implemented on non-Federal Land not entirely within watershed IMNFW – Implemented on non-Federal Land within watershed IMO – Implemented on lands not entirely within watershed Removed Implementation Qualifier Codes: IMR: IMFR: IMRW; IMFRW Edited descriptions of IMF, IMW and IMFW
2014.1	08/22/2014 (pending)	Added Land Use Codes: RegUrb; rpd; rid; UnRegUrb; npd; nid; RegUrbWCSS; RegPUWCSS; RegIUWCSS; UnRegUrbWCSS; UnRegPUWCSS; UnRegIUWCSS
2014.1	08/22/2014 (pending)	Revised BMP and BMP Component Names

Formatted: Normal, Space After: 0 pt, Add space between paragraphs of the same style

PURPOSE of this Document

The purpose of this document is to provide an updated list of all the Chesapeake Bay Program Office Non Point Source (NPS) Best Management Practices (BMPs) codes. It is anticipated that additional codes will be needed and added as the program evolves.

1 Description

This document provides a common reference point for the codes tables used in the Chesapeake Bay Non Point Source Best Management Practices (NPS BMP) XML Exchange. The document is organized as follows:

- 1. A section of definitions and terminology found within this document.
- 2. A section that provides summary list of codes for NPS BMPs.
- 3. A section that provides input section for each code table identified.

Additionally, some of these codes will be identified as defaults when creating NPS BMP records.

2 Definitions and Terminology

Term	Definition	
(R)	Required.	
Code	The column representing the actual code, which will be used in the source	
	BMP applications. It is at the users discretion on the code values to be used.	
	The user must provide a value. One caveat, codes must be unique within a	
	table.	
Identifier Code List	The name of a list of codes. Can be used to identify the URL of the codes list	
	that defines the list of codes.	
CBPO	Chesapeake Bay Program Office	
BMP	Best Management Practices	
NPS	Non Point Source	

3 Code Tables Summary

Code Table	Description
Agency Codes	The code that represents a federal, state, or local agency.
	Included in the Node Document object. Describes the general
	type of the document object (XML, ASCII, ZIP, etc.). Either
	the object itself must be provided or the URL. Where the
	object itself is provided, the file name, type and content
Binary Object Types	elements must be provided.
	The code that represents the party responsible for providing
	the coordinates of the geographic entity. Derived from EDR
Coordinate Data Source Codes	latitude/longitude data standard.
County Codes	The FIPS code that represents the city or county.
	The code describing the method by which the data set may be
Data Source Access Method Codes	accessed.

	T
Code Table	Description
	The name by which the data source is commonly known and
	the internet address at which the data source is located.
	Required when the data source access method is "NODE",
	"FTP", or "DOC." For node based data sources, this data
	element will provide the location at which the relevant node's
	web services can be identified as the first step in accessing the
Data Source Names	data itself.
Electronic Address Type Names	The name that describes the electronic address type.
	The target or event code representing the current status of a
BMP Event Status Codes	practice milestone.
Federal Hydrologic Eight Digit Unit	A federal standardized code that identifies the Hydrologic Unit
Codes	at the fourth order.
Federal Hydrologic Ten Digit Unit	A federal standardized code that identifies the Hydrologic Unit
Codes	at the fifth order.
Federal Hydrologic Twelve Digit	A federal standardized code that identifies the Hydrologic Unit
Unit Codes	at the sixth order.
	The code that represents the unit for measuring the item. If the
	Financial Measure Value is entered, the measure unit elements
Financial Measure Unit Codes	are mandated.
	The code that represents the source of funding for the
	measured item. If the Financial Measure Value is entered, this
BMP Funding Source Codes	element is mandated.
	The code that represents the place for which the geographic
	coordinates were established. If Horizontal Data Collection
	Method is entered, then the Reference Point Code should be
Geographic Reference Point Codes	entered.
	The code that represents the geometric feature type used to
Geometric Type Codes	represent the geometric entities.
Horizontal Accuracy Measure Unit	
Codes	The code that represents the unit for measuring the item.
	The code that represents the reference datum used in the
Horizontal Reference Datum Codes	determination of the horizontal coordinate pairs.
	Indicates the classification system of the Land Use Codes
BMP Land Use Class Code	referenced. CBPO will default to NLCD01 codes only.
BMP Land Use Code	The land use codes of the land use classification system used.
	The code that represents the unit for measuring the item. If the
	NPS BMP Component is entered, the measure unit elements
BMP Component Measure Unit	for component are mandated. If no component is entered, the
Codes	measure unit elements are mandated at the NPS BMP level.
	Name of the Non Point Source Best Management Practice
BMP Component Names	Component.
BMP Component Name Types	Type of NPS BMP Component Name.

Code Table	Description
	The code that represents the unit for measuring the item. If the NPS BMP is entered, the measure unit elements for the BMP
BMP Measure Unit Codes	are mandated
BMP Names	Name of the Non Point Source Best Management Practice.
BMP Name Type Codes	Code indicating if the NPS BMP Name type is the State or Federal Name.
BMP Type Codes	Code for the type of Non Point Source Best Management Practice.
NRCS Practice Codes	National Resource Conservation System Practice Code.
State Codes	A postal code designator used to identify a principal administrative subdivision of the United States, Canada or Mexico.
Telephone Number Type Names	The name that describes the telephone number type.
Tribal Codes	A code that represents American Indian Tribes and Alaskan native entities.
Verification Method Identifier Codes	The code that represents the process used to verify the coordinates of the geometric feature.
Vertical Collection Method Identifier Codes	The identification number or code assigned by the method publisher.
Vertical Measure Unit Codes	The code that represents the unit for measuring the item. Required if vertical measure value is provided.
Vertical Reference Datum Codes	The code that represents the reference datum used in the determination of the vertical coordinates.

Code Input

Agency Codes

Description: List of all codes that represents a federal, state, or local agency.

- Code Unique code to be supplied by the user. Includes State FIPS code and user's unique code (R).
 Name The detailed description of the agency (R).
 Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Name	Code List Identifier
51199	Virginia Department of Conservation and	
	Recreation	
51440	Virginia Department of Environmental Quality	
24510	Maryland Department of Environment	
24998	Maryland Department of Natural Resources	
24999	Maryland Department of Agriculture	

Code	Name	Code List Identifier
42035	Pennsylvania Department of Environmental	
	Protection	
54999	West Virginia Department of Environmental	
	Protection	
10040	Delaware Department of Natural Resources and	
	Environmental Control	
11001	District of Columbia	

4.2 Binary Object Types

Description: Describes the general type of the document object.

- Code Unique code to be supplied by the user.
 Description Description of the code. User may alter this value.
 Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Description	Code List Identifier
ASCII	Flat ASCII File	
DBF	DBASE File	
DGN	MicroStation DGN File	
DOC	WORD Document	
DWG	AutoCad Drawing File	
DXF	CAD Exchange File	
E00	ESRI Export	
EXL	Excel Spreadsheet	
GIF	Image/GIF	
HTML	Hyper Text Markup Language	
JPG	Image/Jpeg	
PDF	Adobe PDF	
SHP	ESRI Shapefile	
SID	MrSid	
TIF	Image/TIF	
TXT	Flat Text	
VSD	Visio Diagram	
WPD	WordPerfect Document	
XML	Extensible Markup Language	
ZIP	Zipped File	
ZIPALT	Zipped File with alternate extension	

4.3 BMP Event Status Codes

Description: Target or event code representing the current status of a practice milestone. Default value is 'IMP'.

List of column definitions:

- 1) Code Unique code to be supplied by the user (R).
- 2) Description Description of the Code (R).
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Description	Code List Identifier
EXP	Exceeded or out of life span	
IMP	Implemented	
IMPCC	Implemented with verification by NRCS or	
	Conservation Corps team	
IMPFD	Implemented with verification by Federal	
	agency	
IMPLO	Implement with verification by locality or	
	agency partner	
IMPST	Implemented with verification by State agency	
PLAN	Planned	
RET	Retired or decommissioned	
INST	Installed	
INSP	Inspected	
MANT	Maintained	

4.4 BMP Funding Source Codes

Description: Represents the source of funding for the measured item. These values will initially be an integrated and merged set of values determined by the CBPO, and the three states.

- 1) Code Unique code to be supplied by the user.
- 2) Description Description of the code.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes

Code	Description	Code List Identifier	
319	EPA 319		
AGR	Agrilink		
BAY	EPA Bay States		
CCD	Public CCD		

Code	Description	Code List Identifier
319	EPA 319	
CREP	State & USDA FSA Conservation Reserve Enhancement Program	
CRP	USDA FSA Conservation Reserve Program	
EQIP	USDA NRCS Environmental Quality Incentives Program	
LOC	Local Funding	
NONG	Non-Government Funding	
SCCNM	SCCNM G&L	
STATE	State Program Funding	

4.5 BMP Land Use Class Code

Description: Classification system for land-use or land-cover being used. Required only if a land-use or land-cover code is referenced.

List of column definitions:

- 1) Class Code Code defining a standard land use or land cover classification system.
- 2) Description Name of the classification system.
- Code List Identifier Location of land use or land cover code lists for referenced classification systems.

Class Code	Description	Code List Identifier
ANDER	Anderson	http://www.state.nj.us/dep/gis/digidownload/metadata/
		<u>lulc95/anderson.html</u>
GAP	USGS Gap Analysis	http://www.consbio.org/pnw_assess/LandStewardship.
		<u>htm</u>
MARESAC	Mid-Atlantic Regional Earth	http://www.geog.umd.edu/resac/pdf/goetz_etal_asprs.p
	Science Applications Center	<u>df</u>
NWI	USF&WS National Wetlands	http://www.fws.gov/nwi/MapCodesLegend.pdf
	Inventory	
NLCD92	National Land Cover Dataset 1992	http://landcover.usgs.gov/classes.php
NLCD01	National Land Cover Dataset 2001	http://landcover.usgs.gov/classes.php
NEIENSB	Codes specific to BMP reporting	Codes listed in this document.

4.6 BMP Land Use Code

Description: Code defining the land use or land cover. Required only when a land use or land cover classification system is referenced. When Class Code is referenced the Class Code Lists Identifier cites the source of land use code descriptions.

- Code land use or land cover code of the referenced classification system.
 Description Description of the code.
 Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

LU Code	Description	Code List Identifier
11	Open Water	NLCD01
12	Perennial Ice/Snow	NLCD01
21	Low Intensity Residential	NLCD01
22	High Intensity Residential	NLCD01
23	Commercial/Industrial/Transportation	NLCD01
24	Pervious Urban without CSO	NEIENSB
25	Impervious Urban without CSO	NEIENSB
26	Pervious & Impervious with CSO	NEIENSB
31	Bare Rock/Sand/Clay	NLCD01
32	Quarries/Strip Mines/Gravel Pits	NLCD01
33	Transitional	NLCD01
41	Deciduous Forest	NLCD01
42	Evergreen Forest	NLCD01
43	Mixed Forest	NLCD01

4.7 BMP & BMP Component Measure Unit Codes

Description: The unit of measure code for the measured NPS BMP value. These values will be inserted into the $Units\ of\ Measure\ Codes\ Table$

- 1) Code Unique code to be supplied by the user.
- 2) Name Name of the unit represented by the code. User may alter this value.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Name	Code List Identifier
ACRE	Acres	
ACRE-FEET	Acre-Feet	
CENT	Centimeters	
COUNT	Count	
FEET	Feet	
FT^SQ	Square Feet	
FT^CU	Cubic Feet	
HA	Hectares	
IN	Inches	
KM	Kilometers	
LBS	Pounds	
MILES	Miles	
MIN	Minutes	
MONTHS	Months	
MTR	Meters	
NA	Unitless Numeric Value	
SEC	Seconds	
THOUS	Thousand Feet	

Code	Name	Code List Identifier
TONS	Tons	
TPAY	Tons Per Acre Per Year	
TPY	Tons Per Year	
YEARS	Years	

Comment [m1]: To be updated following approval of NEIEN Appendix

4.8 BMP and BMP Component Names

Description: Names used to describe the NPS BMPs and BMP Components

List of column definitions:

- 1) Name Name of the NPS BMPs (R).
- 2) BMP and/or Component Specifies whether Name is a valid BMP, BMP Component, or may be used for either.
- 3) Type Identifies type of BMP Name as either federal (preferred) or state. (R)

 $Code\ List\ Identifier-The\ table\ below\ lists\ practices\ (NPS\ BMP\ Names)\ that\ are\ currently\ being\ reported.\ A\ full\ list\ of\ valid\ FEDERAL\ BMPs\ can\ be\ found\ at:\ \frac{http://www.nrcs.usda.gov/Technical/Standards/nhcp.html}{http://www.nrcs.usda.gov/Technical/Standards/nhcp.html}.$

Name	BMP and/or Component	Type
Above Ground, Multi-Outlet Pipeline	BMP & BMP Component	FED

4.9 BMP and BMP Component Name Type CodesDescription: Code indicating if the NPS BMP's Name type is the State or Federal Name. List of column definitions:

- 1) Code Unique code to be supplied by the user (R).
- 2) Description Description of the code (R).
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Description	Code List Identifier
ST	State Name	
FED	Federal Name	

4.10 BMP Type Codes

Description: Code for the type of Non Point Source Best management Practice.

List of column definitions:

- 1) Code Code to be supplied by the user (R).
- 2) Description Description of the code (R).
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes

Code	Description	Code List Identifier
AGR	Agricultural	
FOR	Forest	
SEP	Septic	
STR	Stream Restoration	
URB	Urban	
WET	Wetlands	
WLD	Wildlife	

4.11 Coordinate Data Source Codes

Description: The code that represents the party responsible for providing the coordinates of the geographic entity. Non-government agencies may be included in these values. This list is not all inclusive, just examples.

- 1) Code Unique code to be supplied by the user.
- 2) Name Name of the party supplying the coordinate data.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

	Code	Name	Code List Identifier
--	------	------	----------------------

Code	Name	Code List Identifier
CCD	County Conservation District	
PADEP	Pennsylvania Dept of Environmental Protection	
MDE	Maryland Department of Environment	
MDA	Maryland Department of Agriculture	
VADEQ	Virginia Dept of Environmental Quality	
VADCR	Virginia Dept of Conservation and Recreation	

4.12 County Codes

Description: County FIPS Codes and Descriptions

List of column definitions:

- 1) Code Unique code to be supplied by the user.
- 2) Name County name.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Name	Code List Identifier
	Five-Character Federal FIPS Codes	http://www.itl.nist.gov/fipspubs/

4.13 Data Source Access Method Codes

Description: The code describing the method by which the data may be accessed. NODE indicates that the data is collected per a node request. Files placed on a node in anticipation of a request are documents. Non-node file transfers are either by FTP or some other (ADHOC) method.

- 1) Code code indicating the method (R).
- 2) Description Description of the data access method (R).
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Description	Code List Identifier
NODE	Node	
DOC	Document	
ADHOC	On Request	
FTP	Non-Node File Transfer	

4.14 Data Source Names

Description: Describes the names by which the data sources are commonly known. This list is not all inclusive, just examples.

List of column definitions:

- 1) Name The names by which the data sources are commonly known (R).
- 2) Location The internet address at which the data source is located.

Name	Location
NRCS Toolkit	http://www.itc.nrcs.usda.gov/toolkit/checkin/Default.htm
Virginia NEIEN Node	https://node.deq.virginia.gov/xanode/services/CDXService

4.15 Electronic Address Type Names

Description: The name of the types of electronic addresses, as enumerated in SC_ElectronicAddress_v2.0.xsd

List of column definitions:

1) Name – Name of the type of electronic address

Name
Email
Internet
Intranet
HTTP
FTP
Telnet

4.16 Federal Hydrologic Unit Four Digit Codes

Description: A standardized code that identifies the Federal Hydrologic Unit at the 4th Order. Due to the size of this table the entire codes set will not be included with this document.

- 1) Code Unique federal code to be supplied by the user.
- 2) Description Federal description of the code.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

HUC Four Digit Code	Description	Code List Identifier
0207	Potomac	
0208	Lower Chesapeake	

4.17 Federal Hydrologic Unit Six Digit Codes

Description: A standardized code that identifies the Federal Hydrologic Unit at the 4th Order. Due to the size of this table the entire codes set will not be included with this document. List of column definitions:

- 1) Code Unique federal code to be supplied by the user.
- 2) Description Federal description of the code.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

HUC Six Digit Code	Description	Code List Identifier
020700	Potomac	
020801	Lower Chesapeake	

4.18 Federal Hydrologic Unit Eight Digit Codes

Description: A standardized code that identifies the Federal Hydrologic Unit at the 4th Order. Examples are represented here. Due to the size of this table the entire codes set will not be included with this document. List of column definitions:

- 1) Code Unique federal code to be supplied by the user.
- 2) Description Federal description of the code.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

HUC Eight Digit Code	Description	Code List Identifier
02070011	Lower Potomac	
02080110	Tangier	
02080102	Great Wicomico-Piankatank	

4.19 Federal Hydrologic Unit Ten Digit Codes

Description: A standardized code that identifies the Federal Hydrologic Unit at the 5^{th} Order. Examples are represented here. Due to the size of this table the entire codes set will not be included with this document. List of column definitions:

- 1) Code Unique federal code to be supplied by the user.
- 2) Description Federal description of the code.

3) Code List Identifier - The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

HUC Ten Digit Code	Description	Code List Identifier
0207001103	Nanjemoy Creek-Potomac River	
0208011005	Lower Tangier Sound	
0208010204	Mobjack Bay-Lower Chesapeake Bay	

4.20 Federal Hydrologic Unit Twelve Digit Codes

Description: A standardized code that identifies the Federal Hydrologic Unit at the 6^{th} Order. Examples are represented here. Due to the size of this table the entire codes set will not be included with this document. List of column definitions:

- 1) Code Unique federal code to be supplied by the user.
- 2) Description Federal description of the code.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

HUC Twelve Digit Code	Description	Code List Identifier
020700110305	Gambo Creek-Potomac River	
020801100503	Lower Tangier Sound Channel	
020801020408	Monday Creek-Mobjack Bay	

4.21 Financial Measure Unit Codes

Description: The unit of measure code for the measured financial value. These values will be included in the *Units of Measure* Codes Table.

- 1) Code Unique code to be supplied by the user.
- 2) Name Description of the code. User may alter this value.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Name	Code List Identifier
CENTS	US Cents	
DOLLAR	US Dollars	

4.22 Geographic Reference Point Codes

Description: Represents the place for which geographic coordinates were established.

- 1) Code Unique code to be supplied by the user.
- Name The name of the reference point represented by the code. User may change this description.
 Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes

Code	Name	Code List Identifier
	Administrative Building - a building where business,	
ADBLD	school, or government business affairs are managed	
	Air Monitoring Station - The station where air	
AIRMN	monitoring occurs	
AIRST	Air release stack – The stack where air releases occur	
AIRVT	Air release vent - The vent where air releases occur	
	Atmospheric Emissions Treatment Unit - The unit where	
	atmospheric emissions are treated	
ATETU		
AGBMP	At actual site of installed agricultural BMP.	
	Potential source of contamination to drinking water	
CNTAM	supply	
CNTAR	Center of Area	
CNTER	Center of the facility	
CORNE	Northeast corner of the land parcel	
CORNW	Northwest corner of the land parcel	
CORSE	Southeast corner of the land parcel	
CORSW	Southwest corner of the land parcel	
CTROD	Centroid for the area where the facility is	
	Primary discharge point for a body of water whether	
DISPT	natural or manmade	
ENTFT	Plant entrance (freight) - The freight entrance to a plant	
	Plant entrance (general) - The general entrance to a plant	
ENTGN	or farm	
	Plant entrance (personnel) - The personnel entrance to a	
ENTPE	plant	
	Water monitoring station - The station where water	
H2OMS	monitoring occurs	
H2OPI	Water release pipe - The pipe where water releases occur	
H2OPR	Northwest corner of the land parcel	

Code	Name	Code List Identifier
	Source water protection area - The drinking water source	
H2OSR	area where protective management actions occur	
	Water well - A shaft or dug hole, whose depth is greater	
	than its diameter, sunk into the ground to a depth that	
	allows the withdrawal of water from a water-yielding	
H2OWL	geologic unit	
INPIP	Intake Pipe - A pipe where fluid enters an enclosure	
	Interconnection - A point of connection between	
INTC	facilities	
	Lagoon or settling pond - A body of water at rest, where	
LGOON	clarification takes place as sediment is deposited	
	Loading Area Centroid - The centroid for the loading	
LODCT	area	
LODNG	Loading Facility - The facility where loading occurs	
	Liquid waste treatment unit - The unit where liquid	
LWTU	waste is treated	
PSBS	Point on streambank or shoreline	
	Process unit area centroid - The centroid for the area	
PUCEN	where the process unit is	
PUNIT	Process unit - The unit where processing occurs	
	Spring - A place where ground water flows naturally	
	from a rock or the soil into the land surface or into a	
SPRNG	body of surface water	
STANK	Storage Tank	
	Solid waste storage area - The area where solid wastes	
SWSTR	are stored	
	Solid waste treatment/disposal unit - The unit where sold	
SWTDU	waste are treated or disposed of	
UNK	Unknown - The information is not known	
UPSB	Upstream point on bank or shoreline	
	Water Allocation Permit Primary Source - The water	
	allocation permit location references the primary source	
WAPPS	point covered under the permit	
	Well - A pit or hole sunk into the earth to reach a supply	
WELL	of water	
WELOG	Oil or gas well	
	Wellhead protection area - The surface and subsurface	
	area surrounding a water well or well field, supplying a	
WELPA	public water system, through which contaminants a	

4.23 Geometric Type Codes

Description: The code that represents the geometric feature type used to represent the geometric entities. List of column definitions:

- 1) Code Unique code to be supplied by the user.
- 2) Name The name of the geometric type represented by the code.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Name	Code List Identifier
AREA	The area referenced by geographic coordinates	
LINE	The line referenced by geographic coordinates	
POINT	Point referenced by geographic coordinates	
REGION	A geometric entity described by locational	
	coordinates that include two or more related areas.	
ROUTE	A geometric entity described by locational	
	coordinates that form a contiguous network.	

4.24 Horizontal Accuracy Measure Unit Code

Description: Code that represents the unit of measure of the Horizontal Accuracy Value. Values will be entered into the *Units of Measure Codes* Table.

List of column definitions:

- 1) Code Unique code to be supplied by the user.
- 2) Name The name of the unit represented by the code. User may alter this value.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes

Code	Name	Code List Identifier
CENT	Centimeters	
FEET	Feet	
INCH	Inches	
METER	Meters	
MIN	Minutes	
SEC	Seconds	
THOU	Thousand Feet	

4.25 Horizontal Reference Datum Codes

Description: The code that represents the reference datum used in the determination of the horizontal coordinate pairs.

List of column definitions:

- 1) Code Unique code to be supplied by the user.
- 2) Name The name of the horizontal reference represented by the code. User may alter this value.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes

Code	Name	Code List Identifier
NAD27	North American Datum of 1927	
NAD83	North American Datum of 1983	
OTHER	Unlisted Datum	
WGS84	World Geodetic System of 1984 (Previously	
	GEO84)	
UNK	Unknown	

4.26 NRCS Practice Codes

Description: National Resource Conservation System Practice Code, if applicable. Examples shown. List of column definitions:

- 1) Code Unique code to be supplied by the user.
- 2) Name Practice Name.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Name	Codes List Identifier
431	Above Ground, Multi- Outlet Pipeline	http://www.nrcs.usda.gov/Technical/Standards/nhcp.html
560	Access Road	
316	Animal Mortality Facility	

4.27 State Codes

Description: A two-character postal code designator used to identify a principal administrative subdivision of the United States, Canada or Mexico.

- 1) Code Unique code to be supplied by the user (R).
- 2) Name Name of the State (R).
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Name	Code List Identifier
	Postal State Codes	http://www.usps.com/ncsc/lookups/usps_abbreviations.html

4.28 Telephone Number Type Names

Description: Type of Telephone Number

List of column definitions:

1) Name - The name of the Telephone Number Type

Name	
Cell	
Main Office	
Home Office	
Personal	

4.29 Tribal Codes

Description: Codes representing American Indian tribes and Alaskan native entities. There are no tribes referenced in the CBPO NPS BMPs, so no values are listed below.

List of column definitions:

- 1) Code Unique code to be supplied by the user.
- 2) Description Description of the code.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

4.30 Verification Method Identifier Codes

Description: The code that represents the process used to verify the coordinates of the geometric feature. List of column definitions:

- 1) Code Unique code to be supplied by the user.
- 2) Name The name of the verification method represented by the code.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Name	Codes List Identifier
001	The coordinates are proximate to the centroid of the	
	county	
002	The coordinates are proximate to alternative	
	coordinates for the facility	
003	The coordinates are proximate to the centroid of	
	another polygon	
004	The coordinates are a point within an undefined	
	polygon	
005	The coordinates are a point within the county	
006	The coordinates are a point within the ZIP Code area	
007	The coordinates are verified relative to map features	
	(1:24K)	
008	The coordinates are verified relative to map features	
	(1:100K or TIGER)	
009	The coordinates are verified relative to other map	
	features	
010	The coordinates are verified by an unknown method	
011	The coordinates were determined by ground truth	
012	The coordinates are proximate to the centroid of the	
	ZIP Code	
013	The coordinates were verified as a point in the ZIP	
	Code bounding box	
014	The coordinates were verified as a point in the county	
	bounding box	

4.31 Vertical Collection Method Identifier Codes

Description: List of vertical reference methods

- 1) Code Unique code to be supplied by the user.
- Name The name of the vertical collection method represented by the code.
 Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Name	Codes List Identifier
ALTIM	A method used to determine vertical components	
	based on altimetry	
GPSDF	Geographic coordinate determination method based	
	on GPS code measurements (pseudo range)	
	differential (DGPS)	
GPSKN	Geographic coordinate determination method based	
	on GPS carrier phase kinematic relative positioning	
	technique	
GPSOF	Geographic coordinate determination method based	
	on GPS code measurements (pseudo range) standard	
	positioning service (SA off)	
GPSON	Geographic coordinate determination method based	
	on GPS code measurements (pseudo range) standard	
	positioning service (SA on)	
GPSPR	Geographic coordinate determination method based	
	on GPS code measurements (pseudo range) precise	
	positioning service	
GPSST	Geographic coordinate determination method based	
	on GPS carrier phase static positioning technique	
LVLBM	Precise leveling from a bench mark	
LVLNB	Leveling between non-benchmark control points	
PHGRM	Photogrammetric	
SRVEY	Geographic coordinate determination based on	
	classical surveying techniques	
TOPO	Topographic map interpolation	
TRGLV	Trigonometric leveling	
UNSPF	Other, unspecified	

4.32 Vertical Measure Unit Codes

Description: Units of Measure for the vertical accuracy. These values will be added to the *Units of Measure* Codes Table.

- 1) Code Unique code to be supplied by the user.
- 2) Name The name of the unit represented by the code. User may alter this value.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Name	Code List Identifier
CENT	Centimeters	
FEET	Feet	

Code	Name	Code List Identifier
IN	Inches	
KM	Kilometers	
MIN	Minutes	
MTR	Meters	
THOUS	Thousand Feet	

4.33 Vertical Reference Datum Codes

Description: The code that represents the reference datum used in the determination of the vertical coordinates. List of column definitions:

- 1) Code Unique code to be supplied by the user.
- 2) Name The name of the vertical reference represented by the code.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Name	Code List Identifier
NGV29	National Geodetic Vertical Datum of 1929	
NAV88	North American Vertical Datum of 1988	

4.34 Implementation Qualifier Codes

Description: The code that represents the implementation qualifier for both BMPs and BMP Components. List of column definitions:

- 1) Code Unique code to be supplied by the user.
- 2) Name The name of the implementation qualifier represented by the code.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Name	Code List Identifier
IMF	Implemented on Federal Land not entirely within the Chesapeake Bay watershed portion of a county.	
IMR	Implemented on land regulated by a MS4 permit.	

Code	Name	Code List Identifier
IMW	Implementation entirely within the Chesapeake	
	bay watershed portion of the county identified	
	in the State/FIPS schema data	
	element. Implemented entirely within the	
	Chesapeake Bay watershed portion of the	
	county.	
IMFR	Federal and Regulated land	
IMFW	Federal and CB portion of countyImplemented	
	on Federal Land entirely within the Chesapeake	
	Bay watershed portion of a county.	
IMRW	Regulated and CB portion of county	
IMFRW	Federal, Regulated, and CB portion of county	
<u>IMNF</u>	Implemented on non-Federal Land not entirely	
	within the Chesapeake Bay watershed portion of	
	the county.	
<u>IMNFW</u>	Implemented on non-Federal Land entirely	
	within the Chesapeake Bay watershed portion of	
	the county.	
<u>IMO</u>	Implemented on lands not entirely within the	
	Chesapeake Bay watershed portion of the	
	county.	

Formatted Table

4.35 Verification Qualifier Code

Description: The code that represents the verification qualifier for both BMPs and BMP Components. List of column definitions:

- 1) Code Unique code to be supplied by the user.
- 2) Description The description or definition of the verification qualifier.
 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Description	Code List Identifier
NOMANURE	Manure has not been applied. Applicable to Chesapeake Bay WSM practices whose definitions specify the lack of nutrient application (Cover Crops, Land Retirement to hay without nutrients, etc).	
NOSPREAD Excess manure from animal waste management system has not been spread on crops.		

4.36 Hydrologic Soils Group Code

Description: The code that represents the hydrologic soil group for both BMPs and BMP Components. List of column definitions:

- 1) Code Unique code to be supplied by the user.
- 2) Description The name of the soil type represented by the code.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Description	Code List Identifier
A	Group A soils typically have less than 10 percent clay and more than 90 percent sand or gravel and have gravel or sand textures. Soils in this group have low runoff potential when thoroughly wet.	
В	Group B soils typically have between 10 percent and 20 percent clay and 50 percent to 90 percent sand and have loamy sand or sandy loam textures. Soils in this group have moderately low runoff potential when thoroughly wet.	
С	Group C soils typically have between 20 percent and 40 percent clay and less than 50 percent sand and have loam, silt loam, sandy clay loam, clay loam, and silty clay loam textures. Soils in this group have moderately high runoff potential when thoroughly wet.	
D	Group D soils typically have greater than 40 percent clay, less than 50 percent sand, and have clayey textures. In some areas, they also have high shrink-swell potential. Soils in this group have high runoff potential when thoroughly wet.	
A/B	Mix of Group A & B soils. Lower runoff potential when thoroughly wet.	
C/D	Mix of Group C & D soils. Higher runoff potential when thoroughly wet.	

4.37 BMP Category

Description: The code that represents the category of stormwater performance standard BMP. This is submitted in combination with Previous BMP and other information for all stormwater performance standard BMPs.

- 1) Code Unique code to be supplied by the user.
- 2) Description The name of the stormwater performance standard category.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Description	Code List Identifier
New Development	New Development	
Re-Development	Re-Development	
New Retrofit	New Retrofit	

Code	Description	Code List Identifier
Converted Retrofit	Converted Retrofit	
Enhanced Retrofit	Enhanced Retrofit	
Restored Retrofit	Restored Retrofit	

4.38 Previous BMP

Description: The code that represents the a previously reported BMP that should be converted to a stormwater performance standard BMP through the BMP Category, "Converted Retrofit." This code is only required if "Converted Retrofit" is supplied.

- 1) Code Unique code to be supplied by the user.
- 2) Description The name of the previous BMP that is being converted under a retrofit project.
- 3) Code List Identifier The name of a list of codes. Can be used to identify the URL of the codes list that defines the list of codes.

Code	Description	Code List Identifier
BioRetNoUDAB	Bioretention	
BioRetUDAB	Bioretention	
BioRetUDCD	Bioretention	
BioSwale	Bioswale	
DryPonds	Dry Ponds	
EandS	Erosion and Sediment Control	
ExtDryPonds	Extended Dry Ponds	
Filter	Filter	
Infiltration	Infiltration	
InfiltWithSV	Infiltration	
PermPavNoSVNoUDAB	Permeable Pavement	
PerPavNoSVUDAB	Permeable Pavement	
PermPavNoSVUDCD	Permeable Pavement	
PermPavSVNoUDAB	Permeable Pavement	
PermPavSVUDAB	Permeable Pavement	
PermPavSVUDCD	Permeable Pavement	
ReGenSWConv	Regenerative Stormwater	
	Conveyance	
RetroSWM	Retrofit Stormwater	
VegOpChanNoUDAB	Vegetative Open Channel	
VegOpChanNoUDCD	Vegetative Open Channel	
WetPondWetland	Wet Ponds
