

## Requested Changes to the BMP Schema and Appendix for 2013 Progress

For WTWG Review August 13, 2013

1. **BMP event status** - The partnership might consider enhancing the schema to support more than one event status code and date for a BMP. The event status will also expand to include verification inspection and implementation date. (Recommended by TT/CBPO) For instance:

BMP EVENT STATUS CODE	BMP EVENT STATUS CODE
Installed	10/10/2010
Inspected	10/10/2012
Maintained	07/20/2014

2. **Additional Geospatial Attributes** – Add HUC4 and HUC6 to be used for Ag BMPs. (Requested by VA.)
3. **Appendix Changes for DC Urban Stormwater Practices** – DC is requesting changes to the appendix to accommodate the following practices:

BMP Name	Measurement Name	Unit Name
BaySaver	Area Treated	ACRE
Water Quality Inlet	Area Treated	ACRE
Regenerative Stormwater Conveyance	Watershed Area	ACRE
Trash Removal	Trash Trap	LBS
Trash Removal	Bandalong	LBS
Trash Removal	Water Skimmer	LBS
CSO Separation	Area Separated	ACRE
Cisterns & Rain Barrels	Stormwater Reduction Volume	GALS
Permeable Pavement	Stormwater Reduction Volume	GALS
Urban Forest Buffer	Buffer Length	MILES

Please note that trash removal is not credited in the Bay TMDL. This is strictly to accommodate DC reporting to NEIEN.
