

# New York Healthy Watersheds in Chesapeake Bay Basin

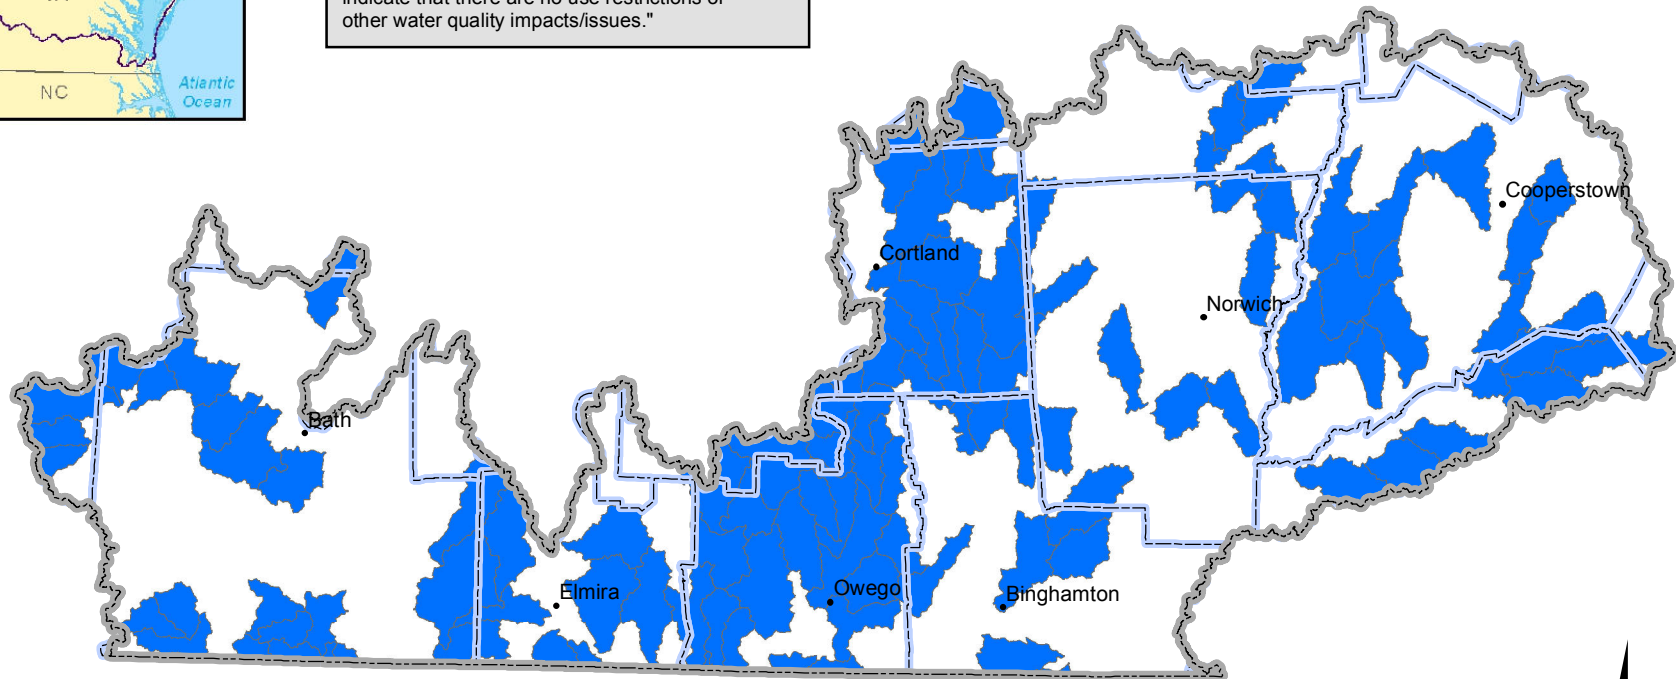

## Watersheds with Majority of Streams No Known Impact

### Watersheds with Majority of Streams No Known Impact

The Waterbody Inventory/ Priority Waterbodies List (WI/PWL) is an inventory of the state's surface water quality. The dataset provides a summary of general water quality conditions, tracks the degree to which a water body supports its designated uses, and monitors progress toward the identifications and resolution of water quality problems, pollutants, and sources. The category of No Known Impact represents "segments where monitoring data and information indicate that there are no use restrictions or other water quality impacts/issues."

■ Watersheds w/ Majority "No Known Impact"

This map was developed to support the "Tracking Healthy Watersheds" project of the Chesapeake Bay Program Maintain Healthy Watersheds Goal Implementation Team.
